The Diabetes Textbook Joel Rodriguez-Saldana, 2019-06-27 Diabetes has become a

worldwide health problem the global estimated prevalence approaches ten percent and the burden of this disease in terms of morbidity and mortality is unprecedented The advances acquired through the knowledge of the mechanisms of the disease and the variety of therapeutic approaches contrast with the inability of private and public health systems in underdeveloped and even developed countries to achieve the goals of treatment This paradox has been described in many sources the surge of scientific advances contrast with an unprecedented amount of human suffering Thus a patient centered and an evidence based approach with the capacity to produce measurable clinical and economic outcomes is required The purpose of this textbook is multiple to offer a comprehensive resource covering all aspects of outpatient management to address diabetes as a health problem from an epidemiological economic and clinical perspective to discuss the role of social determinants of health on the worldwide increase in diabetes to highlight the challenges and obstacles in providing adequate care and to outline a multidisciplinary approach to management in which medical visits retain their importance as part of a team comprising the patient his or her family and a multidisciplinary group of health professionals who are able to move beyond the traditional approach of diabetes as a disease and greatly improve outcomes

Health Informatics on FHIR: How HL7's New API is Transforming Healthcare Mark L. Braunstein, 2018-07-26 This textbook begins with an introduction to the US healthcare delivery system its many systemic challenges and the prior efforts to develop and deploy informatics tools to help overcome those problems It goes on to discuss health informatics from an historical perspective its current state and its likely future state now that electronic health record systems are widely deployed the HL7 Fast Healthcare Interoperability standard is being rapidly accepted as the means to access the data stored in those systems and analytics is increasing being used to gain new knowledge from that aggregated clinical data It then turns to some of the important and evolving areas of informatics including population and public health mHealth and big data and analytics Use cases and case studies are used in all of these discussions to help readers connect the technologies to real world challenges Effective use of informatics systems and tools by providers and their patients is key to improving the quality safety and cost of healthcare With health records now digital no effective means has existed for sharing them with patients among the multiple providers who may care for them and for important secondary uses such as public population health and research This problem is a topic of congressional discussion and is addressed by the 21st Century Cures Act of 2016 that mandates that electronic health record EHR systems offer a patient facing API HL7's Fast Healthcare Interoperability Resources FHIR is that API and this is the first comprehensive treatment of the technology and the many ways it is already being used FHIR is based on web technologies and is thus a far more facile easy to implement approach that is rapidly gaining acceptance It is also the basis for a universal health app platform that literally has the potential to foster innovation around the data in patient records similar to the app ecosystems smartphones created around the data they store FHIR app stores have already been opened by Epic and Cerner the two largest enterprise EHR vendors Provider facing apps are already being explored to improve EHR usability and

support personalized medicine Medicare and the Veteran s Administration have announced FHIR app platforms for their patients Apple s new IOS 11 3 features the ability for consumers to aggregate their health records on their iPhone using FHIR Health insurance companies are exploring applications of FHIR to improve service and communication with their providers and patients SureScripts the national e Prescribing network is using FHIR to help doctors know if their patients are complying with prescriptions This textbook is for introductory health informatics courses for computer science and health sciences students e g doctors nurses PhDs the current health informatics community IT professionals interested in learning about the field and practicing healthcare providers Though this textbook covers an important new technology it is accessible to non technical readers including healthcare providers their patients or anyone interested in the use of healthcare data for improved care public population health or research
