Beckett, 2024-03-12 This book explores the connection between ownership on one hand and immunity from legal responsibility on the other It presents a definition of the concept of beneficial ownership the reasons for its concealment and failures in international legal structures and arrangements Globally states confront complex crimes such as corruption tax evasion doctrinal fanaticism slave trafficking terrorism and war At the personal level men and women may seek to escape their creditors to disinherit unwanted heirs to cheat divorced partners and to appear straightforward when this is not the case The response of politicians and regulators has been a global state initiative to identify beneficial owners via public registers to promote transparency and accountability Yet at the same time there is an equally powerful global and personal counter initiative to promote beneficial ownership avoidance Where there is no owner there is no accountability This book examines what ownership means in legal terms across multiple legal systems and explains why singling out ownership as being pivotal to state and personal accountability is a strategy both flawed and disingenuous It is argued that an apparent lack of political will coupled with shape shifting definitions of ownership have resulted in tokenism Particular attention is paid to those orphan structures which have evolved from standard models or which have been designed for the purpose in each case of facilitating ownership concealment and avoidance The author explains how the virtual world of the blockchain crypto assets and cryptocurrency and virtual entities such as the Decentralised Autonomous Organisations DAOs all of which elude legal classification have opened a new world of possibilities Applicable across all jurisdictions and legal systems the book will be a valuable resource for academics researchers and policy makers working in the areas of financial crime regulation compliance business and accountancy      *Popular Science* ,1993-02 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better      **Research on Emotion and Learning: Contributions from Latin America** Camilo Hurtado-Parrado, Carlos Gantiva, Leonardo A.
