Cortada,2016-03-16 This is the first national history of the role of information in the United States from the 1870s to the present It explores the use of information in the private and public sectors and in the private lives of Americans It argues that this role of information was as important in shaping the United States as the settling of the West the creation of a nation out of immigrants and its democracy *Navigating Public Opinion* Jeff Manza,Fay Lomax Cook,Benjamin I. Page,2002-09-05 Do politicians listen to the public How often and when Or are the views of the public manipulated or used strategically by political and economic elites Navigating Public Opinion brings together leading scholars of American politics to assess and debate these questions It describes how the relationship between opinion and policy has changed over time how key political actors use public opinion to formulate domestic and foreign policy and how new measurement techniques might improve our understanding of public opinion in contemporary polling and survey research The distinguished contributors shed new light

on several long standing controversies over policy responsiveness to public opinion Featuring a new analysis by Robert Erikson Michael MacKuen and James Stimson that builds from their pathbreaking work on how public mood moves policy in a macro model of policymaking the volume also includes several critiques of this model by Lawrence Jacobs and Robert Shapiro another critique by G William Domhoff and a rejoinder by Erikson and his coauthors Other highlights include discussions of how political elites including state level policymakers presidents and makers of foreign policy use or shape public opinion and analyses of new methods for measuring public opinion such as survey based experiments probabilistic polling methods non survey based measures of public opinion and the potential and limitations of Internet polls and surveys Introductory and concluding essays provide useful background context and offer an authoritative summary of what is known about how public opinion influences public policy A must have for all students of American politics public opinion and polling this state of the art collection addresses issues that lie at the heart of democratic governance today

Voices for Children William T. Gormley, 2012-10-05 The United States spends more on programs for the elderly than it does on programs that enhance child development and improve child welfare Why has public policy neglected the development phase of young Americans lives not only in substantive dollars spent but also in program design and implementation Noted child care and education policy expert William Gormley highlights the portrayal of children s issues in both the mass media and in public policymaking to explain why children have gotten short shrift A key explanation is the limited mass media coverage of strong arguments in support of children s programs After documenting changes in rhetoric on children and public policy over time and variations across policy domains and government venues Gormley demonstrates that some issue frames are more effective than others in persuading voters In two randomized experiments he finds that economic frames are more effective than moralistic frames in generating public support for children s programs Independent voters are especially responsive to economic frames In several illuminating case studies in Connecticut Utah North Carolina and Pennsylvania he finds that strong rhetoric makes a difference but that it is sometimes eclipsed by even stronger political and economic constraints Voices for Children offers a fresh perspective on raging debates over child health child poverty child welfare and education programs at the federal and state levels It finds some hopeful examples that could transform how we think about children s issues and the kinds of public policies we adopt
