Part A Completion

Use this completion exercise to check your understanding of the concepts and terms that are presented in this section. Each blank can be completed with a term, short phrase, or number.

- When atoms share electrons to gain the ____1____ configuration of a noble gas, the bonds formed are ____2____. A ____3____ pair of valence electrons constitutes a ____4____ covalent bond. Pairs of valence electrons that are not shared between atoms are called ____5____. Sometimes two or three pairs of electrons may be shared to give ____6____ covalent bonds. In some cases, only one of the atoms in a bond provides the pair of bonding electrons; this is a ____7____ ____8____. It is required to break covalent bonds between atoms. The total energy required to break the bond between two covalently bonded atoms is known as the ____9____.
