This book provides a detailed and comprehensive design of a new second language literacy pedagogy and the results of implementing this pedagogy in different contexts in order to demonstrate that it is possible to address some long-standing second language L2 curriculum and literacy development challenges. The author clearly explains the theory behind Vygotskian Sociocultural Theory of Mind and Systemic Functional Linguistics and how they can inform literacy pedagogy in the form of Concept-Based Language Instruction and a Division of Labor Pedagogy. By presenting detailed qualitative and quantitative analyses and results of multiple forms of data, the author demonstrates the effectiveness of the pedagogy. In conjunction with background on the intricate and interdependent nature of the concepts needed for second language literacy development and in contrast with a cognitivist approach to reading pedagogy and research, the author provides all the details necessary for teachers and researchers to appreciate both the theory and how it
