

MAINstage.™ start here – quick set-up guide

STEP ONE

Unbox and check contents

You should have a MAINstage unit, owner's manual, remote control, batteries, optical cable, stereo 1/8" mini-jack cable, stereo RCA cable, three Angle-Ease™ feet + one extra-long threaded post, and a power cord.

NOTE: We have supplied three commonly needed connecting cables. For some applications you may need to acquire additional cables/adapters (i.e., a digital RCA coax cable or a mini-to-RCA adapter. See steps below for details.).

STEP TWO

Adjust Angle-Ease™ feet

Place one "foot" in the rear and two "feet" in the front (using the widest possible spacing). If mounting on a TV with a steep sloping back, use the 4" screw provided, adding the sleeve and rubber foot from a shorter screw.

STEP THREE

Connect inputs

The MAINstage has 4 inputs for connecting 4 different sound sources. Use the following guide to optimize your connections.

TV Sound

■ From Cable TV

Best – Digital 5.1 Direct

If there's a digital audio out, connect either the RCA or the optical cable (remove optical input dust cover) to one of the digital inputs of the MAINstage. **Note:** The digital audio output of some HDTV Cable Boxes only works when an HDTV channel is being watched. This means you will need to connect both the Digital (Best) and Analog Direct (Good) connections.

Good – Analog Direct

If no digital audio out, connect the analog left and right RCA output to the Analog 2 RCA inputs on the MAINstage. Alternately, if your cable signal runs into your stereo VCR, and then to your TV, connecting your VCR audio to the MAINstage will allow both your cable and VCR signals to be accessed from a single MAINstage input. (See VCR Connection Instructions) **Note:** this hookup does not allow for watching one channel while recording another on your VCR.

Basic – Analog via TV

If your cable connects directly to your TV with no cable box (and you have no stereo VCR in the system), you will need to connect the audio out from your TV (RCA pair) to one of the two audio inputs on the MAINstage. (Analog 2 uses RCA pair. For Analog 1 use RCA pair to 1/8" mini-jack Y-adapter such as Radio Shack catalog #42-2550 or longer 6-ft. #42-2551.) If available, use the fixed (not variable) audio connection. It may need to be selected via TV's set up menu.
