

Accounting Study Guide 23

Chapter 23

Statement of Cash Flows

Primary Purpose

- To provide information about a company's cash inflows and outflows during a period

Secondary Purpose

→ to provide cash-basis information about the company's activities

- The one financial statement where information is NOT presented on an accrual base of accounting
- Very useful for users to know the cash generated from operations and other activities within the company vs the net income shown

Cash is actually cash and cash equivalents

- The basis recommended by FASB for the statement of cash flows is actually "cash and cash equivalents"

Cash Equivalents: short-term, highly liquid investments that are both

- Readily convertible to known amounts of cash
- So near their maturity that they present insignificant risk of changes in interest rates
- we record these under cash accounts
- Maturity is typically within three months

Classification of Cash Flows:

1. Operating Activities

- a. Income statement items as well as changes in certain current assets and current liabilities (since they arise from operations)

2. Investing Activities

- a. Changes in investments (short-term and long-term) and other Long-Term asset items (PP&E, Intangibles)

3. Financing Activities

- Changes in long-term liabilities (debt) and Stockholder's Equity (including dividends paid)

Indirect Method of the Statement of Cash Flows

- Companies overwhelmingly use this format

→ the main difference between this and the direct method is the information presented in the operating activities section

Preparation of Statement of Cash Flows

1. Comparative Balance Sheets
 - a. Use current period and prior period balance sheet data
2. Current Period income statement data (if available)
3. Selected transaction data from a Company's general ledger to provide detail on some of the changes in the balance sheet
 - a. For this chapter, the selected transaction data will be provided as additional information

Major Steps to Preparation

1. Compute how much the cash balance has changed during the period
 - a. In this step, you would also want to compute the change in the balance sheet items to help with subsequent steps
2. Look at the income statement or additional information and identify net income (you starting point of operating activities), potential non-cash related items and start thinking what area in the cash flow each additional information belongs in
3. Go over each change in balance sheet items to
 - a. Convert net income from accrual to cash basis for operating activities
 - b. Disclose cash investing activities from long term assets and short-term investments
 - c. Disclose cash financing activities from long term debt and stockholder's equity
4. Make sure total net cash from operating, investing, and financing is equal to net increase or decrease in cash
5. Prepare required supplemental disclosures
