more flexible yet effective learning opportunities This book recognizes the associated opportunities and challenges for

The comparative investigation of the acquisition of gender in Spanish by early and late bilinguals of different language
combinations is highly debated and crucial as the phenomenon of gender involves grammatical features that differ in all
three languages under investigation Against this background both early and late bilinguals face an arduous learning task
which differs in complexity Couched within a generative framework the empirical study focuses on 257 participants with
different levels of proficiency in Spanish ranging from low to advanced and through a series of tests aims to discover which
extra linguistic and intra linguistic factors act as triggers for non native outcomes in adult heritage speakers and L2 learners
The observed morphological variability is argued not to stem from a representational i e syntactic deficit but rather from a
mapping problem in L2 learners and heritage speakers Successful attainment in terms of gender is possible but dependent
on the interplay between various extralinguistic and linguistic factors Bulletin University of Minnesota,1924 **Annual**
