North Borneo Sourcebook Jason William Lobel, 2016-01-31 North Borneo Sourcebook seeks to address the lack of available data for the languages of northern Borneo where forty to fifty distinct languages are

spoken in the Malaysian state of Sabah alone While members of the Summer Institute of Linguistics SIL have worked in Sabah for several decades and have published articles on individual languages until now no comprehensive survey of the languages of Sabah had yet been done In addition to the languages native to Sabah also included in this monograph are closely related Southwest Sabah languages spoken in neighboring parts of the Malaysian state of Sarawak the Indonesian province of Kalimantan Utara and Brunei Darussalam The author has included 594 entries with equivalents in each of the forty six languages that represent the linguistic variation in north Borneo along with introductory sections listing the personal pronouns demonstrative pronouns and case markers for each language This sourcebook thus fills a critical need in surveying the languages of a single large area in an island of Southeast Asia Many language communities in this region are endangered and likely to disappear as functioning entities within the next generation or two this book may be the only record we will ever have of their existence Linguists and those with an interest in Austronesian languages will appreciate the breadth and detail that illuminate the linguistic scene in an area where before there had been only pinpoints of light *The Princeton Sourcebook in Comparative Literature* David Damrosch,Natalie Melas,Mbongiseni Buthelezi,2021-06-08 Key essays on comparative literature from the eighteenth century to today As comparative literature reshapes itself in today's globalizing age it is essential for students and teachers to look deeply into the discipline's history and its present possibilities The Princeton Sourcebook in Comparative Literature is a wide ranging anthology of classic essays and important recent statements on the mission and methods of comparative literary studies This pioneering collection brings together thirty two pieces from foundational statements by Herder Madame de Staël and Nietzsche to work by a range of the most influential comparatists writing today including Lawrence Venuti Gayatri Chakravorty Spivak and Franco Moretti Gathered here are manifestos and counterarguments essays in definition and debates on method by scholars and critics from the United States Europe Asia Africa and Latin America giving a unique overview of comparative study in the words of some of its most important practitioners With selections extending from the beginning of comparative study through the years of intensive theoretical inquiry and on to contemporary discussions of the world's literatures The Princeton Sourcebook in Comparative Literature helps readers navigate a rapidly evolving discipline in a dramatically changing world The Sourcebook of Magic L Michael Hall,2003-09-18 In The Sourcebook of Magic you will discover afresh the basic 77 NLP patterns for transformational magic This newly revised version streamlines the patterns so that they are even more succinct and offers some new insights into how the patterns work Approaches to Teaching the History of the English Language Mary Hayes,Allison Paige Burkette,2017 The History of the English Language has been a standard university course offering for over 150 years Yet relatively little has been written about teaching a course whose very title suggests its prodigious chronological geographic and disciplinary scope In the nineteenth century History of the English Language courses focused on canonical British literary works Since these early curricula were formed the English language has changed and so have

the courses In the twenty first century instructors account for the growing prominence of World Englishes as well as the English language s transformative relationship with the internet and social media Approaches to Teaching the History of the English Language addresses the challenges and circumstances that the course s instructors and students commonly face The volume reads as a series of master classes taught by experienced instructors who explain the pedagogical problems that inspired resourceful teaching practices Although its chapters are authored by seasoned teachers many of whom are preeminent scholars in their individual fields the book is designed for instructors at any career stage beginners and veterans alike The topics addressed in Approaches to Teaching the History of the English Language include the unique pedagogical dynamic that transpires in language study the course s origins and relevance to current university curricula scholarly approaches that can offer an abiding focus in a semester long course advice about navigating the course s formidable chronological ambit ways to account for the language s many varieties and the course s substantial and pedagogical relationship to contemporary multimedia platforms Each chapter balances theory and practice explaining in detail activities assignments or discussion questions ready for immediate use by instructors

Sociolinguistics and Social Theory Nikolas Coupland, Srikant Sarangi, Christopher N. Candlin, 2014-06-11 The empirical and descriptive strengths of sociolinguistics developed over more than 40 years of research have not been matched by an active engagement with theory Yet over this time social theorising has taken important new turns linked in many ways to linguistic and discursive concerns Sociolinguistics and Social Theory is the first book to explore the interface between sociolinguistic analysis and modern social theory The book sets out to reunite sociolinguistics with the concepts and perspectives of several of the most influential modern theorists of society and social action including Bakhtin Foucault Habermas Sacks Goffman Bourdieu and Giddens In eleven newly commissioned chapters leading sociolinguists reappraise the theoretical framing of their research reaching out beyond conventional limits The authors propose significant new orientations to key sociolinguistic themes including social motivations for language variation and change language power and authority language and ageing language race and class language planning In substantial introductory and concluding chapters the editors and invited discussants reassess the boundaries of sociolinguistic theory and the priorities of sociolinguistic methods Sociolinguistics and Social Theory encourages students and researchers of sociolinguistics to be more reflexively aware and critical of the social bases of their analyses and invites a reassessment of the place sociolinguistics occupies in the social sciences generally

Signs In Law - A Source Book Jan M. Broekman, Larry Catá Backer, 2014-11-06 This volume provides a critical roadmap through the major historical sources of legal semiotics as we know them today The history of legal semiotics now at least a century old has never been written a non event itself pregnant with semiotic possibility As a consequence its sources are seldom clearly exposed and as word object and meaning change are sometimes lost They reach from an English translation of the 1916 inaugural lecture of the first Chair in Legal Significs at the Amsterdam University via mid 20th century studies on property or

contract to equally fascinating essays on contemporary semiotic problems produced by former students of the Roberta Kevelson Semiotics Roundtable Seminar at Penn State University 2012 and 2013 Together the materials in this book weave the fabric of semiotics and signifies two names for the unfolding of semiotics in law and legal discourse at least until the second half of the 20th century and both of which covered a lawyer's focus on sign and meaning in law The latter is embedded within the cultural imperatives of the civilization that gave these terms meaning and made them an effective tool for the dissection of law its reconstitution as an instrument to be used by the lawyer to advance the interests of her clients and for judges as a means to restructure language as a narrative of law whose power could bend behavior to its strictures Legal semiotics has become an indispensable part of the elite lawyer's toolkit and a fundamental approach to analysis of legal texts Two previous volumes published in 2011 and 2012 explored the conceptual methodological and epistemological progress in the field of legal semiotics the modern forms of semiotics study and the mechanics of meaning making processes by lawyers Yet the great lessons of semiotics requires a focus on the origins of the concepts and frameworks that would become contemporary legal semiotics its origins as an object of the consciousness of meaning making one whose roots as lessons for the oracular conversations of law are expanded in this volume *Rendering Chinese Classics into English II* Pan Wenguo, 2025-10-31 This second volume of the three part encyclopedia of Chinese English translation provides a comprehensive exploration of the evolution of translation studies in both China and the West The book systematically examines the development of Western translation theory organizing its progression into five distinct phases It also traces the history of Chinese translation from early Buddhist sutra translations to modern practices offering comparative analysis of Eastern and Western theories and methodologies Additionally the volume explores the evolution of Chinese translation theory before and after the twentieth century with particular attention to the contributions of key figures such as Yan Fu An essential resource for scholars students and practitioners this volume offers invaluable insights into translation methodology and serves as a practical guide for those working with classical Chinese texts It is a must read for anyone engaged in Chinese English translation or Chinese studies *Sourcebook of the Structures and Styles in John 1-10* Sang-Hoon Kim, 2014-07-03 No other book in the New Testament compares to John in its complexity of style and structure So many factors confuse Johannine scholars including the complexity of styles repetition duplication and seemingly distracted structures that are difficult to discern Sourcebook of the Structures and Styles in John 1-10 is designed to scrutinize the structures and styles in John 1-10 reading John according to John's way with the following integrated points of view First this reading is indebted to both diachronic and synchronic approaches Second macro structure and micro style are treated together and interactively Third specific and overall analyses are made together Fourth grammatical and relational considerations are brought together Fifth syntactic semantic and pragmatic relations are considered all together Sixth both parallelisms and chiasms including their variations are examined whether in macro structure or in micro style without excluding either Seventh all types of

parallelisms and chiasms are examined whether simple or complex Eighth ancient and modern ways in writing reading processes complement each other Ninth Western and Eastern perspectives become complementary Tenth the Greek text and its English version by the author are used interactively Eleventh analysis and discussion are brought to complement one another
