Transnational Frontiers of Asia and Latin America since 1800 Jaime Moreno Tejada, Bradley Tatar, 2016-08-19 Frontiers are wild The frontier is a zone of interaction between distinct polities peoples languages ecosystems and economies but how do these frontier spaces develop If the frontier is shaped by the policing of borders by the modern nation state then what kind of zones regions or cultural areas are created around borders This book provides 16 different case studies of frontiers in

Asia and Latin America by interdisciplinary scholars charting the first steps toward a transnational and transcontinental history of social development in the borderlands of two continents Transnationalism provides a shared focus for the contributions drawing upon diverse theoretical perspectives to examine the place making projects of nation states Through the lenses of different scales and time frames the contributors examine the social processes of frontier life and how the frontiers have been created through the exertions of nation states to control marginal or borderland peoples The most significant cases of industrialization resource extraction and colonization projects in Asia and Latin America are examined in this book reveal the incompleteness of frontiers as modernist spatial projects but also their creativity as sources of new social patterns new human adaptations and new cultural outlooks and ways of confronting power and privilege The incompleteness of frontiers does not detract from their power to move ideas peoples and practices across borders both territorial and conceptual In bringing together Asian and Latin American cases of frontier making this book points toward a comparativist and cosmopolitan approach in the study of statecraft and modernity For scholars of Latin America and or Asia it brings together historical themes and geographic foci providing studies accessible to researchers in anthropology geography history politics cultural studies and other fields of the human sciences
