

Chapter 10 Questions

1. The operations of **Warkworth Sinter** are split into profit centres, all of which are required to report monthly. The basic performance criterion is that all profit centres should earn controllable profits amounting to at least 44% of sales. In BC profit centre, the accountant has extracted the following figures from the records for March 2010:

	€
Sales	65,033
Depreciation of fixed assets	6,444
Administration costs (90% fixed)	13,340
Direct materials cost	9,804
Direct labour cost	12,750

The administration costs are all controllable by the profit centre. Depreciation is not controllable at divisional level. Head office costs of €8,883 should also be taken into account for the month.

Required: from the information given, prepare a divisional performance statement for the profit centre BC. Does BC meet the head office basic performance criterion in March 2010?

2. **Salamander Products** manufactures a range of industrial furnaces and ovens. The directors are discussing a plan to expand the company's operations into related areas, together with an internal reorganisation to decentralise their existing activities. Georgette, the Operations Director, explains the advantages of the scheme:

Redesigning Petroleum Taxation Emre Üşenmez, 2018-10-15 Since its inception some 40 years ago petroleum specific taxation in the UK has been subject to numerous modifications. Often these modifications were brought into place not only to sufficiently incentivise the investors but also to capture a fair share for the government. However it is evident from the frequency of changes that finding the right balance between these two aims is no easy matter. Such a balance and the consequent fiscal stability is necessary for the long term relationship between the parties to endure to their mutual benefit. Still it does not take much for one or other party to feel that they are out of balance. As a consequence one party feels that the other party is taking an undue proportion of the value generated and that they are losing out. Yet achieving that balance and fiscal stability is possible. To understand this possibility this book first clarifies what is meant by sufficient incentivisation and fair share before developing a new fiscal system that manages this balance and stability. Such clarification yields objective criteria against which to assess not only the existing regime but also the newly proposed regime. This approach is further complemented by the critical analysis of the fiscal legislative framework and the evaluation of the legal positions of specific contractual elements and mechanisms found within that framework. This latter analysis is important in order to reduce the legal uncertainty such elements may create which can otherwise lead to further reactive amendments and revisions to the fiscal regime in the future.

The Definitive Guide to Warehousing Scott Keller, Council of Supply Chain Management Professionals, Brian C. Keller, 2014 An authoritative guide to planning, implementing, measuring and optimizing world class supply chain warehousing processes, this book explains each warehousing option, basic warehousing storage and handling operations, strategic planning and the effects of warehousing design and service decisions on total logistics costs and customer service.

The Problems with Teamwork, and How to Solve Them Annika Lantz Friedrich, Daniela Ulber, Peter Friedrich, 2019-12-23 This book offers practical, evidence-based solutions to help professionals implement and support effective teamwork. Lantz, Ulber and Friedrich draw on their considerable professional experience to present common problems in team-based organizations, what empirical research tells us the causes are, and which solutions are more effective in overcoming team-based obstacles. In *The Problems with Teamwork and How to Solve Them*, nine common problems are identified, ranging from lack of leadership and adaptability to conflict and cohesiveness, accompanied by clear instructions on how to approach and resolve the individual issues. Detailed case studies are presented throughout the book, demonstrating how theory can be applied to real-life situations to produce optimal results for both the team and the larger organisation. By combining theory and practice and using state-of-the-art research, the book constructs a cognitive map for identifying problem causes and effects and step-by-step instructions on how to solve problems. This is essential reading for anyone working in team-based organizations as well as students and academics in related areas such as organizational psychology and organizational behaviour.
