L2 Grammatical Representation and Processing Deborah Arteaga, 2019-09-19 The chapters in this volume all written by experts in the field present an array of new research on second language acquisition SLA that touches on several current theoretical debates in the field and present a rich range of new empirical data and a number of innovative findings The studies address questions relating to ultimate attainment first language transfer universal properties of SLA processing and second language L2 grammar and explore a number of grammatical features of the L2 tense aspect modality specificity definiteness gender number anaphora These themes are complemented by the study of pragmatic competence in sociocultural aspects of register use The students investigated in the studies range from heritage speakers to naturalistic learners to instructed learners and immigrants Another distinctive feature of this book is the

A Parameter-Setting Model of L2 Acquisition S. Flynn, 2012-12-06 Recent developments in linguistic theory have led to an important reorientation of research in related fields of linguistic inquiry as well as in linguistics itself The developments I have in mind viewed from the point of view of government binding theory have to do with the characterization of Universal Grammar UG as a set of subtheories each with its set of central principles perhaps just one principle central to each subtheory and parameters perhaps just one for each principle according to which a principle can vary between an unmarked and a marked parametric value Chomsky 1985 1986 For example let us assume that there is an X bar theory in explanation of those features of phrase structure irreducible to other subtheories of UG Within X bar theory variation among languages is then allowed only with respect to the position the head of a phrase occupies in relation to its complements such that the phrases of a language will be either right or left headed Thus languages will vary between being right headed in this respect as in Japanese phrase structure and being left headed as in English phrase structure Everything else about the phrase structure of particular languages will be fixed within X bar theory itself or else it will fall out from other subtheories of UG Case theory θ theory etc Chomsky 1985 161-62 Chomsky 1986 2-4 and references cited there Hatters are the same in other modules of grammar
