Voices from the Classroom Brian Hand, Lori Norton-Meier, 2011-10-25 There is much attention currently being given to argument based inquiry in national and state curriculum documents Students are being required to be able to generate and evaluate science knowledge and to think critically and judge the value of evidence and explanations The intent of the book is to provide a rich and broad view of the impact of argument based inquiry in the elementary classrooms from the perspective of the teacher All the teachers and professional development authors were engaged in promoting and using argument based inquiry as the approach to teaching

science They were implementing the Science Writing Heuristic SWH approach as the argument based approach for classroom practice As researchers we constantly work to present our views of these experiences with the voice of the teachers only being relayed through the perspective of the researcher The intent of this book is to provide an opportunity for us as a community to listen to what the teachers are telling us Importantly as demands are being placed on classroom experiences that provide opportunities for students to pose questions make claims and provide evidence that is to think critically and reason like scientists we need to understand what this looks like from the perspective of the teacher This book brings together a range of elementary teachers from kindergarten through to year 6 who have used the Science Writing Heuristic approach to teach argument based inquiry These teachers have all gone through professional development programs and successfully implemented the approach at a high level *Resources in Education*, 1998

Civic Education in the Elementary Grades Dana Mitra, Stephanie C. Serriere, 2015-10-16 Based on a 5 year study of an elementary school with socioeconomic diversity the authors provide an active model of civic engagement organized into three settings Classroom School and Community Each chapter includes an overview of what research has demonstrated about civic engagement in that particular space offers detailed descriptions of activities and closes with lessons for practice This case study demonstrates how putting civics at the center of the curriculum gives purpose and motivation to traditional academic learning including tested subjects such as reading writing and mathematics As former elementary school teachers the authors focus on what is possible in schools rather than a romantic vision of what schools could be Classroom teachers school principals community members and teacher educators can use this resource to foster a deeper richer understanding of what is entailed in civic life

How Do We Know They're Getting Better? John Barell, 2012-01-18 Boost your students 21st century skills How do we measure students inquiry problem solving and critical thinking abilities so that we know they are prepared to meet the challenges of the 21st century John Barell explains how inquiry leads to problem solving and provides specific steps for pre formative and summative assessment that informs instruction of 21st century skills Included are examples that show how to use today's technology in the classroom and how to use inquiry to develop and assess students ability to Think critically and creatively Collaborate with others Become self directed learners Adapt and become resourceful Develop a sense of leadership responsibility and global awareness The authors challenge teachers to reflect on their own learning thinking and problem solving processes as well as those of their students The text provides frameworks for monitoring students progress and guidelines for communicating with parents Teachers will find examples from all grade levels that show how to observe and assess students growth in their development of 21st century capacities making this a timely and valuable resource
