

LED Light Kit Installation Instructions

Covers Part #6795

Kit contents:

- 3-volt accessory power supply
- Electronic speed control (ESC) power tap
- 3x10mm button-head cap screws (2)
- Roof skid plate with front and rear LED light bars
- Front bumper with LED light bar
- Body template
- Zip ties (3)

Tools needed:

- 2.0mm hex wrench
- 2.5 mm hex wrench
- Tapered body reamer (part #3433 or #3433X, sold separately)
- Body scissors (part #3431 or #3432, sold separately)

CAUTION: RISK OF INJURY!

Use care with hobby knives, tapered reamers, and other cutting tools as they are extremely sharp and can cause severe injury, deep cuts, and/or punctures.

CAUTION: RISK OF DAMAGE TO BATTERIES!

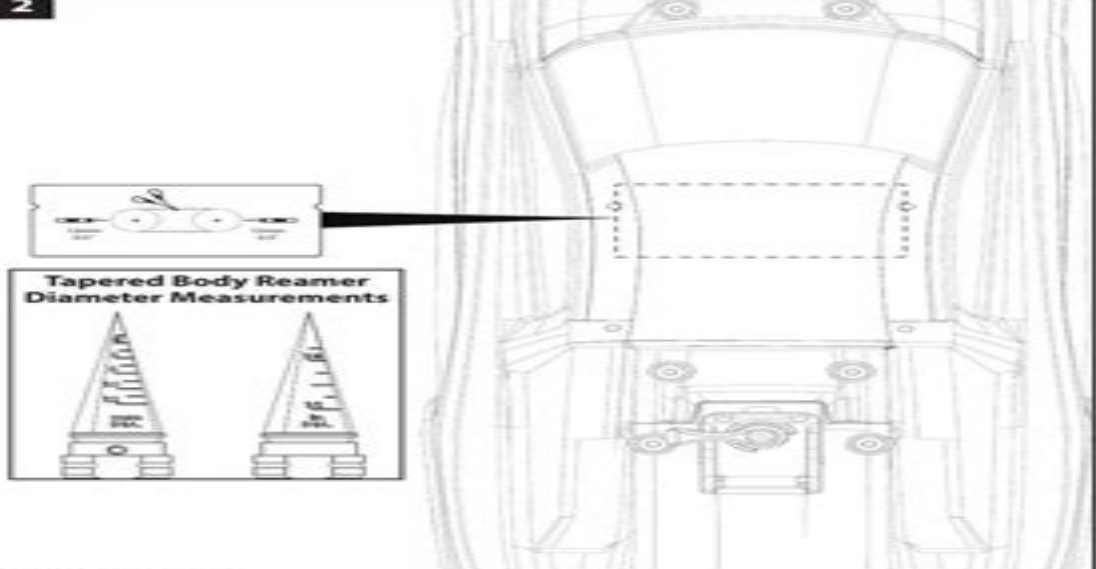

Do not attach the power tap to the battery connector. Attach to the electronic speed control (ESC) connector only. Always disconnect the battery from the ESC when not in use to prevent the possibility of over-discharge.

1

Remove the existing roof skid plate.

2

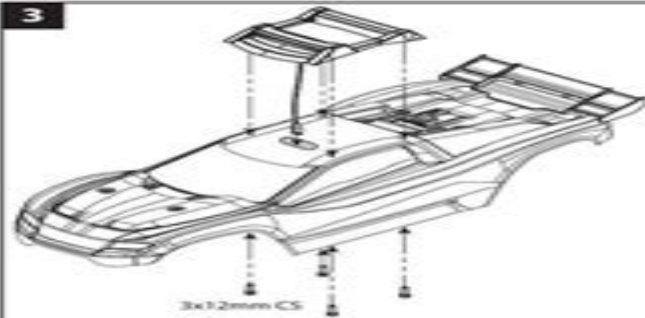

Tapered Body Reamer Diameter Measurements

Body modification:

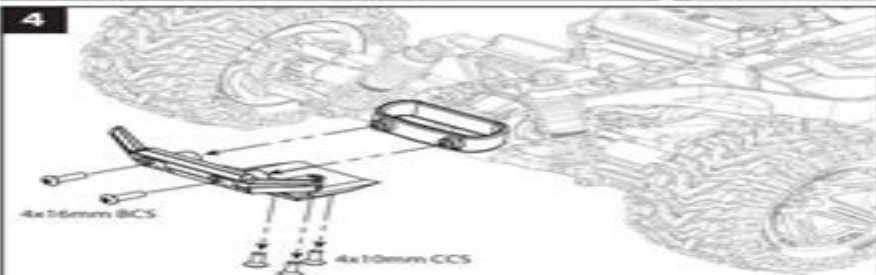

Before installation of the new roof skid plate, the vehicle body will need modification. Peel the backing from the included self-adhesive cutting template. Install the template on the vehicle body, aligning the holes in the template with the front screw holes in the roof. Using a tapered body reamer, carefully cut holes in the roof to the dotted lines on the template (note the hole diameters indicated on the template and the corresponding diameter measurements on the body reamer). Use body scissors to cut out the section between the two holes as indicated.

3

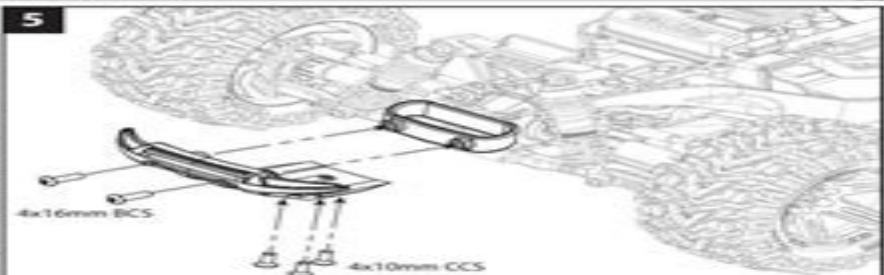

Install the new roof skid plate; feed the wire harness connector through the hole in the roof.

4

Remove the existing front bumper.

5

Install the new front bumper. See step 9 for wire routing.
