Kawata,Stephanie Williamson,Tom LaTourrette,2000-07-19 Why do students have different achievement levels across states Is math achievement improving across states Differences in average achievement levels across states are mainly traceable to differing family characteristics However students from similar families also score differently across states These differences are related to differences in resource levels and in how resources are spent States with high spending per pupil lower pupil teacher ratios higher participation in public prekindergarten and higher reported teacher resources have higher achievement Disadvantaged children are the most sensitive to low resource and additional resources could substantially raise their scores Between state rather than within state differences in resources appear to be the main reason for inequitable resource levels for students of lower socioeconomic status The conclusion is that significant math gains are occurring across most states that cannot be traced to resource changes that the rate of gain varies significantly by state and that reform efforts are the likely cause of these gains The results certainly challenge the traditional view of public education as unreformable Excellence Gaps in Education Jonathan A. Plucker,Scott J. Peters,2020-01-15 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In Excellence Gaps in Education Jonathan A Plucker and Scott J Peters shine a spotlight on excellence gaps the achievement gaps among subgroups of students performing at the highest levels of achievement Much of the focus of recent education reform has been on closing gaps in achievement between students from different racial ethnic or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American Hispanic Native American and poor students resulting in an incalculable loss of potential among our fastest growing populations Drawing on the latest research and a wide range of national and international data the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies including universal screening flexible grouping targeted programs and psychosocial interventions Excellence Gaps in Education has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high potential students from underrepresented backgrounds **English-Only Instruction and Immigrant Students in Secondary Schools** Lee Gunderson,2017-09-25 This book is for teachers teacher educators school and district administrators policy makers and researchers who want to know about literacy cultural diversity and students who speak little or no English It offers a rich picture of the incredible diversity of students who enter secondary school as immigrants their abilities their needs and their aspirations The studies reported are part of a large longitudinal study of about 25 000

immigrant students in a district in which the policy is English only instruction These studies provide multiple views of the students lives and their success in schools where the language of instruction differs from the languages they speak with their friends and families explore the students views of teaching and learning describe the potential differences between the students views and those of their teachers look at issues related to students views of their identities as they work study and socialize in a new environment and examine different reading models designed to facilitate the learning of English as a second language ESL Educators and researchers will find the descriptions of students simultaneous learning of English and of academic content relevant to their view of whether instruction should be English only or bilingual For teachers who view multicultural education as an important endeavor this book may on occasion surprise them and at other times confirm their views The author does not attempt to develop a particular political viewpoint about which approach works best with immigrant students Rather the objective of the studies was to develop a full rich description of the lives of immigrant high school students enrolled in classes where the medium of instruction is English The reader is left to evaluate the results

Academic Productivity of Chicago Public Elementary Schools ,1998 The Relationship between Student Achievement and Multilingualism: A Quantitative Causal-Comparative Study Jennifer Thomson,2011-05-15 Multilingualism enhances cognitive neuro linguistic and meta linguistic development It is proposed that improved student performance might be achieved if the U S educational system mainstreamed foreign language teaching as early as elementary school The research hypothesis of this quantitative causal comparative study was therefore that multilingual students should achieve significantly higher scores in standardized tests of basic skills relative to monolingual students Simple random samples of 500 monolingual and 500 multilingual students in grades 5 through 8 with similar socio economic status were drawn There was a significant difference between the combined scores of the monolingual and multilingual students indicating higher multilingual scores The results of this and other studies should influence educational policy on language teaching Urgent action is demanded from educational administrators and curriculum specialists to make foreign language teaching an integral part of the curriculum
