ICPMG2014 - Physical Modelling in Geotechnics Christophe Gaudin, David White, 2019-01-08 The 8th International Conference on Physical Modelling in Geotechnics ICPMG2014 was organised by the Centre for Offshore Foundation Systems at the University of Western Australia under the auspices of the Technical Committee 104 for Physical Modelling in Geotechnics of the International Society of Soil Mechanics and Geotechnical Engineering This quadrennial conference is the traditional focal point for the physical modelling community of academics scientists and engineers to present and exchange the latest developments on a wide range of physical modelling aspects associated with geotechnical engineering These proceedings together with the seven previous proceedings dating from 1988 present an inestimable collection of the technical and scientific developments and breakthroughs established over the last 25 years These proceedings include 10 keynote lectures from scientific leaders within the physical modelling community and 160 peer reviewed papers from 26 countries They are organised in 14 themes presenting the latest developments in physical modelling technology modelling techniques and sensors through a wide range of soil structure interaction problems including shallow and deep foundations offshore geotechnics dams and embankments excavations and retaining structures and slope stability Fundamental aspects of earthquake engineering geohazards ground reinforcements and improvements and soil properties and behaviour are also covered demonstrating the increasing complexity of modelling arising from state of the art technological developments and increased understanding of similitude principles A special theme on education presents the latest developments in the use of physical modelling techniques for instructing undergraduate and postgraduate students in geotechnical engineering

Massage Therapy E-Book Susan G. Salvo, 2019-02-28 Make the essential principles of massage therapy more approachable Covering massage fundamentals techniques and anatomy and physiology Massage Therapy Principles and Practice 6th Edition prepares you for success in class on exams and in practice settings The new edition of this student friendly text includes more than 700 images expanded information on the latest sanitation protocols critical thinking questions at the end of each chapter and updated pathologies which reflect what you will encounter in the field UPDATED pathologies ensure they are current and reflect what you will see in the field as a practitioner UPDATED Research Literacy and evidence informed practice skills emphasize how to locate and apply scientific data and the latest research findings in your massage practice Licensing and Certification Practice Exams on Evolve mimics the major high stakes exams in format and content builds confidence and helps increase pass rates Complete anatomy and physiology section in addition to material on techniques and foundations you all the information you need in just one book Robust art program enhances your understanding and comprehension of each topic presented through visual representation Case studies challenge you to think critically and apply your understanding to realistic scenarios foster open mindedness cultural competency and stimulate dialogue Profile boxes provide an inspirational real world perspective on massage practice from some of the most respected

authorities in massage and bodywork Clinical Massage chapter focuses on massage in therapeutic and palliative settings such as hospitals chiropractic and physical therapy offices nursing homes and hospice care centers to broaden your career potential Business chapter loaded with skills to help make you more marketable and better prepared for today's competitive job market NEW UPDATED information throughout including the latest sanitation protocols ensures the most current accurate and applicable content is provided and is appropriate for passing exams and going straight into practice NEW Critical thinking questions at the end of the chapters help you develop clinical reasoning skills NEW Maps to FSMTB's MBLEx exam the Entry Level Analysis Project ELAP and Massage Therapy Body of Knowledge MTBOK to illustrate that our content is in line with the core entry level massage therapy curriculum NEW Revised Kinesiology images include colored indications of origins and insertions

Learning to Save the World Betsey Behr Brada, 2023-02-15 Learning to Save the World provides an innovative analysis of how individuals inhabit, refuse, and reconfigure the contours of global health. In 2001, Botswana's government, faced with one of the highest HIV prevalence rates in the world, committed itself to sub-Saharan Africa's first free public HIV treatment program. US-based private foundations and medical schools offered support to demonstrate the feasibility of public HIV treatment in Africa. Given US interest and investment in global health, this support created opportunities for US physicians and medical trainees to interact with local practitioners, treat patients, and shape health policy in Botswana. Although global health has emerged as a powerful call to planetary moral action, the nature of this exhortation remains unclear: Is global health a new movement for social justice, or is it neocolonial, creating new dependencies under the banner of humanitarianism? Betsey Behr Brada shows that global health is a frontier, an imaginative framework that organizes the space, time, and ethics of encounter. Learning to Save the World reveals how individuals and collectivities engaged in global health, visiting experts as well as local clinicians and patients, come to regard themselves and others in terms of this framework.

Sharing Clinical Trial Data Institute of Medicine, Board on Health Sciences Policy, Committee on Strategies for Responsible Sharing of Clinical Trial Data, 2015-04-20 Data sharing can accelerate new discoveries by avoiding duplicative trials, stimulating new ideas for research, and enabling the maximal scientific knowledge and benefits to be gained from the efforts of clinical trial participants and investigators. At the same time, sharing clinical trial data presents risks, burdens, and challenges. These include the need to protect the privacy and honor the consent of clinical trial participants, safeguard the legitimate economic interests of sponsors, and guard against invalid secondary analyses which could undermine trust in clinical trials or otherwise harm public health. Sharing Clinical Trial Data presents activities and strategies for the responsible sharing of clinical trial data. With the goal of increasing scientific knowledge to lead to better therapies for patients, this book identifies guiding principles and makes recommendations to maximize the benefits and minimize risks. This report offers guidance on the types of clinical trial data available at different points in the process, the points in the process at which each type of data should be

shared methods for sharing data what groups should have access to data and future knowledge and infrastructure needs Responsible sharing of clinical trial data will allow other investigators to replicate published findings and carry out additional analyses strengthen the evidence base for regulatory and clinical decisions and increase the scientific knowledge gained from investments by the funders of clinical trials The recommendations of Sharing Clinical Trial Data will be useful both now and well into the future as improved sharing of data leads to a stronger evidence base for treatment This book will be of interest to stakeholders across the spectrum of research from funders to researchers to journals to physicians and ultimately to patients

Trends in Renewable Energies Offshore C. Guedes Soares,2022-11-02 Renewable energy resources offshore are a growing contributor to the total energy production in a growing number of countries As a result the interest in the topic is increasing Trends in Renewable Energies Offshore includes the papers presented at the 5th International Conference on Renewable Energies Offshore RENEW 2022 Lisbon Portugal 8 10 November 2022 and covers recent developments and experiences gained in concept development design and operation of such devices The scope of the contributions is broad covering all aspects of renewable energies offshore activities including Resource assessment Tidal Energy Wave Energy Wind Energy Solar Energy Renewable Energy Devices Multiuse Platforms Maintenance planning Materials and structural design Trends in Renewable Energies Offshore will be of interest to academics and professionals involved or interested in applications of renewable energy resources offshore The Proceedings in Marine Technology and Ocean Engineering series is dedicated to the publication of proceedings of peer reviewed international conferences dealing with various aspects of Marine Technology and Ocean Engineering The Series includes the proceedings of the following conferences the International Maritime Association of the Mediterranean IMAM conferences the Marine Structures MARSTRUCT conferences the Renewable Energies Offshore RENEW conferences and the Maritime Technology MARTECH conferences The Marine Technology and Ocean Engineering series is also open to new conferences that cover topics on the sustainable exploration and exploitation of marine resources in various fields such as maritime transport and ports usage of the ocean including coastal areas nautical activities the exploration and exploitation of mineral resources the protection of the marine environment and its resources and risk analysis safety and reliability The aim of the series is to stimulate advanced education and training through the wide dissemination of the results of scientific research

Judgment and Decision Making Under Uncertainty: Descriptive, Normative, and Prescriptive Perspectives David R. Mandel,Gorka Navarrete,Nathan Dieckmann,Jonathan D. Nelson,2019-09-26

Realist Evaluation for Crime Science Graham Farrell,Aiden Sidebottom,2018-10-17 This collection of essays published to mark the 20th anniversary of Realistic Evaluation celebrates the work of Professor Nick Tilley and his significant influence on the fields of policing crime reduction and evaluation With contributions from colleagues co authors and former students many of whom are leading scholars in their own right the thirteen essays which make up this volume contain both personal reflections and analysis of the prominent

topics in Professor Tilley's forty years of scholarship *Digital Health* Alan Godfrey, Sam Stuart, 2021-07-06 *Digital Health Exploring Use and Integration of Wearables* is the first book to show how and why engineering theory is used to solve real world clinical applications considering the knowledge and lessons gathered during many international projects This book provides a pragmatic A to Z guide on the design deployment and use of wearable technologies for laboratory and remote patient assessment aligning the shared interests of diverse professions to meet with a common goal of translating engineering theory to modern clinical practice It offers multidisciplinary experiences to guide engineers where no clinically advice and expertise may be available Entering the domain of wearables in healthcare is notoriously difficult as projects and ideas often fail to deliver due to the lack of clinical understanding i e what do healthcare professionals and patients really need This book provides engineers and computer scientists with the clinical guidance to ensure their novel work successfully translates to inform real world clinical diagnosis treatment and management Presents the first guide for wearable technologies in a multidisciplinary and translational manner Helps engineers design real world applications to help them better understand theory and drive pragmatic clinical solutions Combines the expertise of engineers and clinicians in one go to guide accessible to all **Scientific American** ,1881 Monthly magazine devoted to topics of general scientific interest

Translational Medicine in CNS Drug Development George G. Nomikos, Douglas E. Feltner, 2019-06-18 *Translational Medicine in CNS Drug Development* Volume 29 is the first book of its kind to offer a comprehensive overview of the latest developments in translational medicine and biomarker techniques With extensive coverage on all aspects of biomarkers and personalized medicine and numerous chapters devoted to the best strategies for developing drugs that target specific disorders this book presents an essential reference for researchers in neuroscience and pharmacology who need the most up to date techniques for the successful development of drugs to treat central nervous system disorders Despite increases in the number of individuals suffering from CNS related disorders the development and approval of drugs for their treatment have been hampered by inefficiencies in advancing compounds from preclinical discovery to the clinic However in the past decades game changing strides have been made in our understanding of the pathophysiology of CNS disorders and the relationship of drug exposure in plasma and CNS to pharmacodynamic measures in both animals and humans Includes comprehensive coverage of biomarker tools and the role of personalized medicine in CNS drug development Discusses strategies for drug development for a full range of CNS indications with particular attention to neuropsychiatric and neurocognitive disorders Includes chapters written by international experts from industry and academia **Simulating Social Complexity** Bruce Edmonds, Ruth Meyer, 2017-11-24 This volume examines all aspects of using agent or individual based simulation This approach represents systems as individual elements having their own set of differing states and internal processes The interactions between elements in the simulation represent interactions in the target systems What makes this social is that it can represent an observed society Social systems include all those systems where the components

have individual agency but also interact with each other This includes human societies and groups but also increasingly socio technical systems where the internet based devices form the substrate for interaction These systems are central to our lives but are among the most complex known This poses particular problems for those who wish to understand them The complexity often makes analytic approaches infeasible but on the other hand natural language approaches are also inadequate for relating intricate cause and effect This is why individual and agent based computational approaches hold out the possibility of new and deeper understanding of such systems This handbook marks the maturation of this new field It brings together summaries of the best thinking and practices in this area from leading researchers in the field and constitutes a reference point for standards against which future methodological advances can be judged This second edition adds new chapters on different modelling purposes and applying software engineering methods to simulation development Revised existing content will keep the book up to date with recent developments This volume will help those new to the field avoid reinventing the wheel each time and give them a solid and wide grounding in the essential issues It will also help those already in the field by providing accessible overviews of current thought The material is divided into four sections Introduction Methodology Mechanisms and Applications Each chapter starts with a very brief section called Why read this chapter followed by an abstract which summarizes the content of the chapter Each chapter also ends with a section on Further Reading Whilst sometimes covering technical aspects this second edition of *Simulating Social Complexity* is designed to be accessible to a wide range of researchers including both those from the social sciences as well as those with a more formal background It will be of use as a standard reference text in the field and also be suitable for graduate level courses

Human Movement and Motor Control in the Natural Environment Peter A Federolf, Maurice Mohr, Thorsten Stein, Gert-Jan Pepping, Steven van Andel, Gillian Weir, 2023-06-08 The basic understanding of human movement and control of human movement stems largely from laboratory measurements where human movement can be quantified with high precision and accuracy but where the artificial environment compromises ecological validity A good example for this issue was demonstrated in a recent investigation specifically that the walking gait pattern of healthy individuals in a laboratory changed as a function of how many researchers were present during the experiment Observations like these underscore that study volunteers adapt their behavior to the specific laboratory environment and warrant the question of how well we can transfer our lab based understanding of gait patterns and the underlying neuromuscular control system to walking during daily living Another research area where lab based movement assessments have led to conflicting findings is the field of sports injury prevention Many neuromuscular training programs have been shown to be effective in reducing the sport injury rate in athletes by 30 50% or more in a variety of different multi directional sports Nevertheless lab based assessments of the same athletes who completed those training programs were often not able to detect improvements in motor control of sport specific movements or a reduction in joint loading two factors thought to be closely linked with sport injury risk This

disconnect suggests that lab based assessments of movement and motor control are often poor indicators of player behavior during real game scenarios and may limit our ability to screen athletes for injury risk or monitor their progress in rehabilitation. These examples highlight that we should strive for the assessment and investigation of human movement and motor control in natural environments i.e. where individuals patients athletes or other groups of interest perform explore and interact under real world conditions.

Miscarriages of Justice in Canada Kathryn M. Campbell, 2018-06-12 Innocent people are regularly convicted of crimes they did not commit. A number of systemic factors have been found to contribute to wrongful convictions including eyewitness misidentification, false confessions, informant testimony, official misconduct, and faulty forensic evidence. In *Miscarriages of Justice in Canada*, Kathryn M. Campbell offers an extensive overview of wrongful convictions, bringing together current sociological, criminological, and legal research, as well as current case law examples. For the first time, information on all known and suspected cases of wrongful conviction in Canada is included and interspersed with discussions of how wrongful convictions happen, how existing remedies to rectify them are inadequate, and how those who have been victimized by these errors are rarely compensated. Campbell reveals that the causes of wrongful convictions are in fact avoidable and that those in the criminal justice system must exercise greater vigilance and openness to the possibility of error if the problem of wrongful conviction is to be resolved.

[Bearing Capacity of Roads, Railways and Airfields](#) Andreas Loizos, Imad Al-Qadi, Tom Scarpas, 2017-07-20 *Bearing Capacity of Roads, Railways and Airfields* includes the contributions to the 10th International Conference on the Bearing Capacity of Roads, Railways and Airfields (BCRRA 2017), 28-30 June 2017, Athens, Greece. The papers cover aspects related to materials, laboratory testing, design, construction, maintenance, and management systems of transport infrastructure and focus on roads, railways, and airfields. Additional aspects that concern new materials and characterization, alternative rehabilitation techniques, technological advances, as well as pavement and railway track substructure sustainability are included. The contributions discuss new concepts and innovative solutions and are concentrated but not limited on the following topics: Unbound aggregate materials and soil properties; Bound materials characteristics, mechanical properties, and testing; Effect of traffic loading; In situ measurements, techniques, and monitoring; Structural evaluation; Pavement serviceability condition; Rehabilitation and maintenance issues; Geophysical assessment; Stabilization and reinforcement; Performance modeling; Environmental challenges; Life cycle assessment and sustainability. *Bearing Capacity of Roads, Railways and Airfields* is essential reading for academics and professionals involved or interested in transport infrastructure systems in particular roads, railways, and airfields.

The Oxford Handbook of Digital Technologies and Mental Health Marc N. Potenza, Kyle Faust, David Faust, 2020-08-17 Digital technology use, whether on smartphones, tablets, laptops, or other devices, is prevalent across cultures. Certain types and patterns of digital technology use have been associated with mental health concerns, but these technologies also have the potential to improve mental health through the gathering of information by targeting interventions and through delivery of

care to remote areas The Oxford Handbook of Digital Technologies and Mental Health provides a comprehensive and authoritative review of the relationships between mental health and digital technology use including how such technologies may be harnessed to improve mental health Understanding the positive and negative correlates of the use of digital technologies has significant personal and public health implications and as such this volume explores in unparalleled depth the historical and cultural contexts in which technology use has evolved conceptual issues surrounding digital technologies potential positive and potential negative impacts of such use treatment assessment and legal considerations around digital technologies and mental health technology use in specific populations the use of digital technologies to treat psychosocial disorders and the treatment of problematic internet use and gaming With chapters contributed by leading scientists from around the world this Handbook will be of interest to those in medical and university settings students and clinicians and policymakers

Kinesiology for Occupational Therapy Melinda F. Rybski, 2024-06-01 Kinesiology for Occupational Therapy Third Edition covers the theoretical background for understanding the kinematics and kinetics of normal human physiological movement Each specific joint is assessed in terms of musculoskeletal function movements possible and an overview of pathology that may develop Dr Melinda Rybski covers four occupational therapy theories related to functional motion that are important for occupational therapists to know This Third Edition has been updated to reflect the current field and includes new information that has emerged in recent years New in the Third Edition Content closely follows AOTA's Occupational Therapy Practice Framework and Occupational Therapy Vision 2025 Updated and more extensive provision of evidence that summarizes key findings in current literature New theories are presented in the Intervention sections Extensive joint specific and theory based assessments are provided Interventions described are occupation based process based Kinesiology concepts presented in a practical useable way Expanded chapters for Spine and Thorax and Hip and Pelvis Included with the text are online supplemental materials for faculty use in the classroom Kinesiology for Occupational Therapy Third Edition clearly outlines the need for an understanding of kinesiology in occupational therapy providing occupational therapists with the evidence necessary to support their intervention strategies

Second Generation Cell and Gene-Based Therapies Alain Vertes, Nathan J. Dowden, Devyn Smith, Nasib Qureshi, 2020-02-07 Second Generation Cell and Gene Based Therapies Biological Advances Clinical Outcomes and Strategies for Capitalisation serves as the only volume to the market to bridge basic science clinical therapy technology development and business in the field of cellular therapy cytotherapy After more than two decades of painstaking fundamental research the concept of therapeutic cells stem cells genes etc beyond the concept of vaccines is reaching clinical trial with mounting confidence in the safety and efficacy of these products Nonetheless numerous incremental technical advances remain to be achieved Thus this volume highlights the possible R D paths which will ultimately facilitate clinical delivery of cutting edge curative products The next waves of innovation are reviewed in depth for hematopoietic stem cells mesenchymal stem cells tissue engineering CAR T cells and

cells of the immune system as well as for enabling technologies such as gene and genome editing Additionally deep dives in product fundamentals history of science pathobiology of diseases scientific and technological bases and financing and technology adoption constraints are taken to unravel what will shape the cytotherapy industry to the horizon 2025 and beyond The outcome is not simply a scientific book but a global perspective on the nascent field combining science business and strategic fundamentals Helps readers learn about the most current trends in cell based therapy their overall effectiveness from a clinical prospective and how the industry is moving therapies forward for capitalization Perspectives section at the end of each chapter summarizes key learnings hypotheses and objectives highlighted and combines scientific and business insights Edited and authored by scientists representing both basic and clinical research and industry presenting a complete story of the current state and future promise of cellular therapies

The Adulteration of Children's Sports

Kristi Erdal,2020-07-20 The Adulteration of Children s Sports explores current behavioral and physiological research about how children s organized sport has changed how adults goals and needs are at the heart of those changes and the consequences of those changes on children s enjoyment of sport and on their autonomy creativity and moral reasoning outside of sport Adult introduction of early competition extrinsic rewards early sport specialization and year round participation has thwarted children s intrinsic motivation and contributed to children s attrition from sport Kristi Erdal explores concerns about the future of sport itself as adult mediated selection practices whittle down young athletes earlier on shakier criteria Parents and coaches complicity in these practices however is based on intermediaries poorly interpreting or ignoring the research literature Thus the final chapters of this book are about translating the research into applied ideas for change Erdal provides an essential introduction to evidence based research about children s health and well being in sport and debunks myths along the way Adults built the problems compiled in this text We can dismantle them as well

Investment and Interventions to Improve the Quality of Education Systems Jin Chi,Eduardo Velez

Bustillo,2021-12-28 Quality improvement is a major current goal of Education in China and this will be achieved through overall quality improvement of the education system as a whole a situation that is also the case across the world Deploying a cost benefit analysis and multidisciplinary perspectives from education economics neurocognition gender studies child development and international development this book presents a range of critical interventions in education development and investment that have proven to be effective in many countries around the world The book draws on theoretical and practical experience in the field of education investment and analyses key issues in China s early childhood education early reading girls education brain science application in international education small scale schools in low income areas and teacher education Students and scholars of education and development and Chinese education will benefit from this title

The Enigmatic Realm of **Trial Examination Physical Science Paper 2 2014**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language reveals its inherent magic. Its capacity to stir emotions, ignite contemplation, and catalyze profound transformations is nothing lacking extraordinary. Within the captivating pages of **Trial Examination Physical Science Paper 2 2014** a literary masterpiece penned with a renowned author, readers attempt a transformative journey, unlocking the secrets and untapped potential embedded within each word. In this evaluation, we shall explore the book's core themes, assess its distinct writing style, and delve into its lasting impact on the hearts and minds of those that partake in its reading experience.
