Roads to the Great War The Russian Civil War was one of the most fateful of the 20th century's military conflicts a bloody three year struggle whose outcome saw the establishment of a totalitarian communist regime within the former Russian Empire As such it commands the attention of the military specialist and layman alike as we mark the one hundredth anniversary of the war's end This work is the third volume of the three volume Soviet official history of the Russian Civil War which appeared during 1928 1930 just before the imposition of Stalinist orthodoxy While the preceding volumes focused on the minutiae of the Red Army's organizational development and military art this volume provides an in depth description and analysis of the civil war's major operations along the numerous fronts from the North Caucasus the Don and Volga rivers the White Sea area the Baltic States and Ukraine as well as Siberia and Poland It also offers a well argued case for the political reasons behind the Bolsheviks military strategy and eventual success against their White opponents And while it is a certainly a partisan document with a definite political bias it is at the same time a straightforward military history that manages to avoid many of the hoary myths that later came to dominate the subject As such it is easily the most objective account of the struggle to emerge from the Soviet Union before the collapse of the communist system in 1991 **Chinese**

Constitutionalism in a Global Context Peng Chengyi, 2018-08-06 Over the course of the last four decades as China's ideological realm has been transformed it has become significantly more complicated This is well illustrated in the current discourse concerning China's constitutional future Among Chinese intellectuals the liberal constitutionalism paradigm is widely accepted However more recently this perspective has been challenged by mainland New Confucians and Sinicized Marxists alike The former advocate a constitutionalism that is based upon and loyal to the Confucian tradition while the latter has sought to theorize the current Chinese constitutional order and reclaim its legitimacy This book presents a discussion of these three approaches analyzing their respective strengths and weaknesses and looking to the likely outcome The study provides a clear picture of the current ideological debates in China while developing a platform for the three schools and their respective constituencies to engage in dialogue pluralize the conceptions of constitutionalism in academia and shed light on the political path of China in the 21st Century The consequences of this Chinese contribution to the global constitutionalism debate are significant Notions of the meaning of democratic organization of the nature of the division of authority between administrative and political organs of the nature and role of political citizenship of the construction of rights are all implicated It is argued that China's constitutional system when fully theorized and embedded within the global discourse might serve as the German Basic Law did in its time as a model for states seeking an alternative approach to the legitimate construction of state political structures and institutions **Trade-in Guide, 1990**, 1990
