Mercer,Tracy J. Trothen,2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest

Deconstructing Transhumanism Michael G. Sherbert,2025-09-30 Deconstructing Transhumanism A Religion Without Religion challenges the widely held view that transhumanism a movement advocating for the enhancement of human life through technology is purely secular and scientific Instead this groundbreaking study reveals how transhumanist thought remains deeply shaped by religious ideas particularly those rooted in Christianity Drawing on the philosophy of Jacques Derrida Michael G Sherbert explores how religious concepts like the sacred messianism salvation and transcendence quietly persist within transhumanist visions of the future often without reflection on the potential dangers they carry From artificial intelligence to the dream of digital immortality this book uncovers how technological aspirations often mirror age old religious hopes Through a careful analysis of leading figures such as Ray Kurzweil David Pearce and Nick Bostrom Sherbert shows that even the most futuristic goals often retain hidden religious structures what Derrida calls a religion without religion Spanning philosophical inquiry ethical reflection and cultural critique Deconstructing Transhumanism invites readers to rethink the assumptions behind some of today s most influential ideas about technology progress and the future It offers a timely examination of the religious undercurrents shaping Western technological imaginaries urging greater

awareness of the powerful and sometimes perilous narratives we carry into our increasingly high tech future *Muslim and Supermuslim* Roy Jackson, 2020-02-05 This book looks to the rich and varied Islamic tradition for insights into what it means to be human and by implication what this can tell us about the future human The transhumanist movement in its more radical expression sees Homo sapiens as the cousin perhaps the poorer cousin of a new Humanity 2.0 Man is replaced by Superman The contribution that Islam can make to this movement concerns the central question of what this Superman or Supermuslim would actually entail To look at what Islam can contribute we need not restrict ourselves to the Qur'an and the legal tradition but also reach out to its philosophical and literary corpus Roy Jackson focuses on such contributions from Muslim philosophy science and literature to see how Islam can confront and respond to the challenges raised by the growing movement of transhumanism

Temples of Modernity Robert M. Geraci, 2018-08-15 Temples of Modernity uses ethnographic data to investigate the presence of religious ideas and practices in Indian science and engineering Geraci shows 1 how the integration of religion science and technology undergirds pre and post independence Indian nationalism 2 that traditional icons and rituals remain relevant in elite scientific communities and 3 that transhumanist ideas now percolate within Indian visions of science and technology This work identifies the intersection of religion science and technology as a worldwide phenomenon and suggests that the study of such interactions should be enriched through attention to the real experiences of people across the globe

natural selection had been responsible for the transformation of life Through its ordering principles and through chance it had given rise to humankind which had ushered in a new phase of evolution Humanity stood on the threshold of yet another critical point in evolution The consciously purposive phase of evolution This open access book explores the history of transhumanism by analyzing how Julian Huxley s transhumanism develops and why it does at this particular point in time by placing it firmly within the context of his specific scientific and sociopolitical milieu starting roughly in the interwar years and stretching over the Second World War to the 1970s Continuing the study then focuses on the new transhumanists of the 1970s 1980s and 1990s and investigates continuity in mode of thinking contributing to a more coherent understanding of transhumanism its history and of modern projects of human enhancement The book captures how scientific and technological development in relation to society and social order shapes images and expectations of the future and of what future is desirable
