Science and Philosophy in the Indian Buddhist Classics, Vol. 1 Thupten Jinpa, 2017-11-07. Explore the nature of our material world in a unique sourcebook conceived by the Dalai Lama collecting the scientific observations found in classical Buddhist treatises. Under the visionary supervision of His Holiness the Dalai Lama, Science and Philosophy in the Indian Buddhist Classics brings together classical Buddhist explorations of the nature of our material world and the human mind and puts them into context for the modern reader. It is the Dalai Lama's view that the explorations by the great masters of northern India in the first millennium CE still have much that is of interest today, whether we are Buddhist or not. Volume 1: The Physical World explores the nature of our material world from the macroscopic to the microscopic. It begins with an overview of the many frameworks such as the so-called five aggregates that Buddhist thinkers have used to examine the nature and scope of reality. Topics include sources of knowledge, the scope of reason, the nature and constituents of the material world, theories of the atom, the nature of time, the formation of the universe and the evolution of life, including a detailed explanation of the early Buddhist theories on fetal development. The volume even contains a brief presentation on early theories about the structure and function of the brain and the role of microorganisms inside the human body. The book weaves together passages from the works of great Buddhist thinkers such as Asanga, Vasubandhu, Nagarjuna, Dignaga, and

Dharmakirti Each of the major topics is introduced by Thupten Jinpa the Dalai Lama's principal English language translator and founder of the Institute of Tibetan Classics

Traces of Vermeer Jane Jelley, 2017-07-21 Johannes Vermeer's luminous paintings are loved and admired around the world yet we do not understand how they were made We see sunlit spaces the glimmer of satin silver and linen we see the softness of a hand on a lute string or letter We recognise the distilled impression of a moment of time and we feel it to be real We might hope for some answers from the experts but they are confounded too Even with the modern technology available they do not know why there is no evidence of any preliminary drawing why there are shifts in focus and why his pictures are unusually blurred Some wonder if he might possibly have used a camera obscura to capture what he saw before him The few traces Vermeer has left behind tell us little there are no letters or diaries and no reports of him at work Jane Jelley has taken a new path in this detective story A painter herself she has worked with the materials of his time the cochineal insect and lapis lazuli the sheep bones soot earth and rust She shows us how painters made their pictures layer by layer she investigates old secrets and hears travellers tales She explores how Vermeer could have used a lens in the creation of his masterpieces The clues were there all along After all this time now we can unlock the studio door and catch a glimpse of Vermeer inside painting light
