Nijs,2016-01-26 In today s increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2 0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2 0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state **The Routledge Handbook of Financial Literacy** Gianni Nicolini,Brenda J. policymakers involved in trade or other relations with China will benefit from a comprehensive update of what the current law is and a critical view of what the challenges are the 2021 IPLCN is a recommended read for those who seek a well written English textbook which covers the main principles of Chinese IP Law Clearly outlined it is probably one of the best of its kind on the market Its existence is welcome and necessary in the current era where languages are still obstacles By Tian Lu Book Review for The IP Kitten September 2021 *Law and Economics of Personalized Medicine* Karin Bosshard,2018-05-14 The book adds to the discussion about strategic approaches towards the translation of personalized medicine into clinical practice It stresses the importance of non science related institutional barriers A Law and Economics perspective is applied in order to examine the incentives induced by the barriers An applied part identifies and evaluates policy levers to foster the translation of personalized medicine into Swiss clinical practice *ICEL 2018 13th International Conference on e-Learning* Professor Eunice Ivala,2018-07-05 **Intellectual Property Excesses** Enrico Bonadio,Aislinn O'Connell,2022-06-30 This collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property IP may lead to It collects and comments on a series of IP disputes which have taken the notion of IP protection to extremes From individuals being sued for hundreds of thousands of dollars for sharing a playlist to sports spectators being arrested for wearing the wrong dresses passing through granting patents for inventions obtained by misappropriating traditional knowledge and trademark protection of merely descriptive signs this book brings together a broad range of examples from across the IP spectrum where protection and enforcement have been used or threatened on unreasonable and or untenable grounds The aim of the book is to criticise these excesses precisely because they harm IP and because they contribute to creating an environment where more and more people are led to hate IP and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade competition and people s freedom This is not therefore a book against IP it is instead a call for change and an attempt to save IP through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism The book includes a foreword by Jason Mazzone Albert E Jenner Jr Professor of Law at the University of Illinois USA Research Handbook on Inflation Guido Ascari,Riccardo Trezzi,2025-06-09 This Research Handbook provides a comprehensive overview of the multifaceted landscape of inflation studies policy and practice Analysing theoretical and empirical literature on measuring inflation and on the drivers of inflation dynamics it sheds light on developments in monetary policy over the past two decades **Journal of Economic Literature** ,2014 **The Economics of Defense Industry** Thomas-Durell Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced

financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation. In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand. The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions. Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments. The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis. This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy. The chapters in this book were originally published in various issues of *Defense Security Analysis*.

Hitler's Shadow Empire Pierpaolo Barbieri, 2015-04-14

A revealing look at Nazi involvement in the Spanish Civil War their economic ambitions how it came to be and how they operated. Pitting fascists and communists in a showdown for supremacy the Spanish Civil War has long been seen as a grim dress rehearsal for World War II. Francisco Franco's Nationalists prevailed with German and Italian military assistance a clear instance it seemed of like minded regimes joining forces in the fight against global Bolshevism. In *Hitler's Shadow Empire* Pierpaolo Barbieri revises this standard account of Axis intervention in the Spanish Civil War arguing that economic ambitions not ideology drove Hitler's Iberian intervention. The Nazis hoped to establish an economic empire in Europe and in Spain they tested the tactics intended for future subject territories. The Nazis provided Franco's Nationalists with planes armaments and tanks but behind this largesse was a Faustian bargain. Through weapons and material support Germany gradually absorbed Spain into an informal empire extending control over key Spanish resources in order to fuel its own burgeoning war industries. This plan was only possible and profitable because of Hitler's economic czar Hjalmar Schacht a wizard of international finance. His policies fostered the interwar German recovery and consolidated Hitler's dictatorship. Though Schacht's economic strategy was eventually abandoned in favor of a very different conception of racial empire Barbieri argues it was in many ways a more effective strategic option for the Third Reich. Deepening our understanding of the Spanish Civil War by placing it in the context of Nazi imperial ambitions *Hitler's Shadow Empire* illuminates a fratricidal tragedy that still reverberates in Spanish life as well as the world war it heralded. Praise for *Hitler's Shadow Empire*. A fascinating beautifully written account of a plan for the German economic domination of Europe that was pushed in the 1930s by the Nazis but above all by non Nazi and more traditionally oriented German economic bureaucrats Barbieri makes us think again about the relationship between economics and racial policies in the making of Nazi aggression. Harold James author of *Making the European Monetary Union*. *Hitler's Shadow Empire* recasts our understanding of the German and Italian interventions in the Spanish Civil War. In this brilliant debut Barbieri shows that informal imperialism played a more important part than fascist ideology in the way that Berlin looked at the conflict. Barbieri also has a keen ear for the

continuing echoes of the Civil War for Spain and indeed for Europe today Niall Ferguson author of *The Ascent of Money*
