*Dynamics of Human Reproduction* James W. Wood, 2017-09-29 Awarded the W W Howells Award for the Outstanding Book in Biological Anthropology this volume presents a comprehensive integrated and up to date overview of the major physiological and behavioral factors affecting human reproduction In attempting to identify the most important causes of variation in fertility within and among human populations Wood summarizes data from a wide range of societies Trained as an anthropologist as well as a demographer he devotes special attention to so called natural fertility populations in which modern contraceptives and induced abortion are not used to limit reproductive output Such an emphasis enables him to study the interaction of biology and behavior with particular clarity The volume weaves together the physiological

demographic and biometric approaches to human fertility in a way that will encourage future interdisciplinary research. Instead of offering a general overview the focus is to answer one question: Why does fertility and the number of live births vary from couple to couple within any particular population and from population to population across the human species as a whole? Topics covered include ovarian function, conception and pregnancy, intrauterine mortality, reproductive maturation and senescence, coital frequency and the waiting time to conception, marriage patterns and the initiation of reproduction, the fertility-reducing effects of breastfeeding, the impact of maternal nutrition on reproduction and reproductive seasonality. This unique combination of comprehensive subject matter and an integrated analytical approach makes the book ideally suited both as a graduate level textbook and as a reference work.

Water Guy Proulx, 2012-08. Water: The Universal Healer shares the lifesaving message that with adequate clean water the body heals naturally and that the effects of many common health complaints can be alleviated with proper hydration. Author Guy Proulx began lecturing on hydration before it became popular; he witnessed its success among his massage clients. He makes the vital point that of all the mammals on this planet humans are the only ones who drink anything but water once they are finished nursing. Educating and teaching individuals about how the body works has always been his most powerful healing tool. The Earth consists of more water than land mass. Water gives life to the whole planet and every living being on it. Consider these three amazing facts about water: There is not one thing on Earth that water cannot break down. Even diamonds in time are no match for water. There is nothing that water will not clean or dilute. Water is the universal solvent. There is absolutely no living organism on the planet that does not depend totally on water for its healing powers and life-giving nourishment to survive. Water: The Universal Healer speaks to the fact that to intentionally deprive your body of water is tantamount to embarking on a slow, insidious and premature death.
