a single transgene copy into the plant genome is less likely to trigger gene silencing often associated with multiple gene insertions When the first edition of Agrobacterium Protocols was published in 1995 only a handful of plants could be routinely transformed using Agrobacterium Agrobacterium mediated transformation is now commonly used to introduce DNA into many plant species including monocotyledon crop species that were previously considered non hosts for Agrobacterium Most remarkable are recent developments indicating that Agrobacterium can also be used to deliver DNA to non plant species including bacteria fungi and even mammalian cells **Monthly Catalog of United States Government Publications** ,1987 *Collaborative Computing: Networking, Applications and Worksharing* Honghao Gao,Xinheng Wang,Yuyu Yin,Muddesar Iqbal,2019-02-06 This book constitutes the thoroughly refereed proceedings of the 14th International Conference on Collaborative Computing Networking Applications and Worksharing CollaborateCom 2018 held in Shanghai China in December 2018 The 43 full and 19 short papers presented were carefully reviewed and selected from 106 submissions The papers reflect the conference sessions as follows vehicular networks social networks information processing data detection and retrieval collaborative computing social networks vehicular networks networks and sensors information processing and collaborative computing mobility and software testing and formal verification web services and image information processing web services and remote sensing Insect Biodiversity Robert G.
