# Overview of the Skeleton: Classification and Structure of Bones and Cartilages

Name karen ortegoni Lab Time/Date july 29

## Cartilages of the Skeleton

1. Using the key choices, identify each type of cartilage described (in terms of its body location or function) below.

Key: a. elastic

b. fibrocartilage

c. hyaline

elastic

1. supports the external ear

fibrocartilage

6. meniscus in a knee joint

fibrocartilage

2. between the vertebrae

hyaline

7. connects the ribs to the sternum

elastic

3. forms the walls of the voice box (larynx)

fibrocartilage

8. most effective at resisting compression

elastic

4. the epiglottis

elastic

9. most springy and flexible

hyaline

5. articular cartilages

hyaline

10. most abundant

## Classification of Bones

2. The four major anatomical classification of bones are long, short, flat, and irregular. Which category has the least amount of spongy bone relative to its total volume? long bones
3. Classify each of the bones in the chart below as either long, short, flat, or irregular by placing a check mark in the appropriate column. Also use a check mark to indicate whether the bone is a part of the axial or the appendicular skeleton. Use Figure 8.1 as a guide.

	Long	Short	Flat	Irregular	Axial skeleton	Appendicular skeleton
Sternum	•		•			
Radius	•					
Calcaneus (tarsal bone)				•		
Parietal bone (cranial bone)			•			
Phalanx (single bone of a digit)		•				
Vertebra				•

**Human Anatomy Laboratory Manual with Cat Dissections** Elaine Nicpon Marieb, 1996-06-27 *Anatomy & Physiology Laboratory Manual and E-Labs E-Book* Kevin T. Patton, 2018-01-24 Using an approach that is geared toward developing solid logical habits in dissection and identification the Laboratory Manual for Anatomy and coloring exercises offer a kinesthetic experience useful in retention of content User friendly spiral binding allows for hands free viewing in the lab setting Step by step dissection instructions with accompanying illustrations and photos cover anatomical models and fresh or preserved specimens and provide needed guidance during dissection labs The dissection of tissues organs and entire organisms clarifies anatomical and functional relationships 250 illustrations including common histology slides and depictions of proper procedures accentuate the lab manual s usefulness by providing clear visuals and guidance Easy to evaluate tear out Lab Reports contain checklists drawing exercises and questions that help you demonstrate your understanding of the labs you have participated in They also allow instructors to efficiently check student progress or assign grades Learning objectives presented at the beginning of each exercise offer a straightforward framework for learning Content and concept review questions throughout the manual provide tools for you to reinforce and apply knowledge of anatomy and function Complete lists of materials for each exercise give you and your instructor a thorough checklist for planning and setting up laboratory activities allowing for easy and efficient preparation Modern anatomical imaging techniques such as computed tomography CT magnetic resonance imaging MRI and ultrasonography are introduced where appropriate to give future health professionals a taste for and awareness of how new technologies are changing and shaping health care Boxed hints throughout provide you with special tips on handling specimens using equipment and managing lab activities Evolve site includes activities and features for students as well as resources for instructors

**Part - Anatomy & Physiology Laboratory Manual - E-Book** Kevin T Patton, PhD, 2014-12-02 Effectively master various physiology dissection identification and anatomic explorations in the laboratory setting with the Anatomy Physiology Laboratory Manual 9th Edition This practical full color lab manual contains 55 different A P lab exercises that cover labeling anatomy identification dissection physiological experiments computerized experiments and more The manual also includes safety tips a comprehensive instruction and preparation guide for the laboratory and tear out worksheets for each of the 55 exercises In addition 8 e Lab modules offer authentic 3D lab experiences online for virtual lab instruction 8 interactive eLabs further your laboratory experience in the digital environment Complete list of materials for each exercise offers a thorough checklist for planning and setting up laboratory activities Over 250 illustrations depict proper procedures and common histology slides Step by step guidance for dissection of anatomical models and fresh or preserved specimens with accompanying illustrations helps you become acclimated to the lab environment Physiology experiments centering on functional processes of the human body offer immediate and exciting examples of physiological concepts Easy to evaluate tear out lab reports contain checklists

drawing exercises and questions that help you demonstrate your understanding of the labs they have participated in Reader friendly spiral binding allows for hands free viewing in the lab setting Labeling and coloring exercises provide opportunities to identify critical structures examined in the lab and lectures Brief learning aids such as Hints Landmark Characteristics and Safety First are found throughout the manual to help reinforce and apply knowledge of anatomy and function Modern anatomical imaging techniques such as MRIs CTs and ultrasonography are introduced where appropriate Boxed hints and safety tips provide you with special insights on handling specimens using equipment and managing lab activities UPDATED Fresh activities keep the manual current and ensure a strong connection with the new edition of the A P textbook NEW Updated illustrations and design offer a fresh and upbeat look for the full color design and learning objectives NEW Expanded and improved student resources on the Evolve companion website include a new version of the Body Spectrum electronic coloring book

**PhysioEx 7.0 for A&P** Peter Z. Zao,2008 Forensic Anthropology Laboratory Manual Steven N. Byers,Chelsey A. Juarez,2024-11-11 This manual provides students in academic laboratory courses with hands on experience in the major processes of forensic anthropology Designed to accompany the textbook Introduction to Forensic Anthropology sixth edition the manual introduces core procedures and protocol with exercise worksheets to reinforce the methodologies of forensic anthropology and enhance student comprehension For the fifth edition the manual has been updated in line with the textbook incorporating new methods figures and worksheets Each chapter contains explanations of the terminology osteological features and measurements needed to understand each of the topics New for this edition in many chapters students will find the incorporation of QR codes to give them immediate access to relevant video or website content to assist with the task at hand In addition in an attempt to create an inclusive learning environment the authors have included online resources for most chapters that can be used in place of skeletons or other classroom resources so that all students can utilize the lab manual regardless of their classroom setup Chapters may be covered in one session or multiple sessions and include lists of both basic and optional lab materials enabling instructors to tailor each lab to the resources they have available

**HUMAN SKELETAL ANATOMY** Scott I. Fairgrieve,Tracy S. Oost,2001-01-01 The Human Skeletal Anatomy Laboratory Manual and Workbook has been designed to help students who are enrolled in courses dedicated to this topic It is the product of many years of designing and instructing a Human Skeletal Biology course for undergraduate students The key to this manual is flexibility Instructors may utilize as much or as little of the manual as they see fit It is largely based on the regional approach to anatomy However the first section of the manual begins with a survey of the microscopic and macroscopic structure of bone After grounding the student in the basics of bone structure the manual then turns to the gross morphological anatomy of skeletal elements The axial skeleton is dealt with first then the appendicular skeleton The manual is designed to cover material in an incremental fashion Specifically the anatomy of less complicated bones such as the ribs sternum and hyoid are discussed prior to other axial bones in order to acquaint students with how to

handle real bone material in the laboratory Each successive laboratory session demands more from the student in both the level of understanding and expectations in assigned laboratory exercises Each laboratory session begins with an introduction in order to familiarize the student with the areas to be studied Subsequently the laboratory session has a stated purpose with clear instructions of expectations and learning objectives Important Terms are clearly indicated in boxes to stress to students that these must be understood This is then followed by a clear laboratory Procedure for the student to follow This usually involves the identification of particular features of assigning specific tasks as identified in the various Exercises Finally as a means of stressing the applicability of what has been learned in the laboratory exercise the student will be requested to generate an evaluation of some aspect of the anatomy such as using a method for determining age at death from assigned specimens The student is then required to interpret this information and produce for the next class or session a Laboratory Research Report Guidelines for these reports are contained within this manual Diagrams photographs have been provided for students to label These diagrams are meant to be a study guide Instructors may wish to add anatomical features or de-emphasize certain features accordingly

Anatomy & Physiology Elaine Nicpon Marieb, 2002 KEY MESSAGE Anatomy Physiology Third Edition answers the demand for a leaner version of Elaine Marieb and Katja Hoehn's Human Anatomy Physiology with less in depth coverage of pregnancy heredity and the developmental aspects of various body systems while keeping basic themes such as homeostatic imbalances strategically in place This revised edition includes major updates to the content and figures based on current research findings Organization of the Body The Human Body An Orientation Chemistry Comes Alive Cells The Living Units Tissues The Living Fabric For all readers interested in Human Anatomy Physiology

*The Anatomy and Biology of the Human Skeleton* D. Gentry Steele, Claud A. Bramblett, 1988 This handsome volume is the first photographically illustrated textbook to present for both the student and the working archaeologist the anatomy of the human skeleton and the study of skeletal remains from an anthropological perspective It describes the skeleton as not just a structure but a working system in the living body The opening chapter introduces basics of osteology or the study of bones the specialized and often confusing terminology of the field and methods for dealing scientifically with bone specimens The second chapter covers the biology of living bone its structure growth interaction with the rest of the body and response to disease and injury The remainder of the book is a head to foot structure by structure bone by bone tour of the skeleton More than 400 photographs and drawings and more than 80 tables illustrate and analyze features the text describes In each chapter structures are discussed in detail so that not only can landmarks of bones be identified but their functions can be understood and their anomalies identified as well Each bone's articulating partners are listed and the sequence of ossification of each bone is presented Descriptive sections are followed by analyses of applications how to use specific bones to estimate age stature gender biological affinities and state of health at the time of the individual's death Anthropologists archaeologists and paleontologists as well as physicians medical examiners anatomists and students of

these disciplines will find this an invaluable reference and textbook      *Physioex 6.0* Timothy Stabler, Greta Peterson, Lori Smith, 2005-03 KEY BENEFIT PhysioEx 6.0 for Human Physiology consists of 13 modules containing 40 physiology lab simulations that may be used to supplement or substitute for wet labs KEY TOPICS Cell Transport Mechanisms and Permeability Skeletal Muscle Physiology Neurophysiology of Nerve Impulses Endocrine System Physiology Cardiovascular Dynamics Frog Cardiovascular Physiology Respiratory System Mechanics Chemical and Physical Processes of Digestion Renal System Physiology Acid Base Balance Blood Analysis Serological Testing Histology Tutorial For all readers interested in lab simulations      **Criminalistics Laboratory Manual** Elizabeth Erickson, 2012-12-31 Criminalistics Laboratory Manual provides students who have little to no prior knowledge of forensic science with a practical crime scene processing experience The manual starts with an original crime scene narrative setting up the crime students are to solve This narrative is picked up in each of the 17 forensic science lab activities tying all forensic disciplines together to show the integrated workings of a real crime lab The lab activities cover fingerprints blood typing and spatter analysis hair and fiber digital forensics and more After completing all of the exercises the student will be able to solve the homicide based on forensic evidence Each chapter also includes an introduction to the type of forensic evidence covered and practice exercises and key definitions prepare students for the laboratory exercise While fitting in with the larger crime scene narrative the individual chapters are written so that they can be used separately giving instructors flexibility Original crime scene scenario engages students drawing them into the forensic scientific process Practical hands on crime scene processing activities with clear detailed instructions for how to perform each laboratory exercise Laboratory objectives key terms review questions and glossary of terms keep the student focused on what's important No forensic science lab required alternative materials and equipment are suggested if a science lab is not available      *PhysioEx for Human Physiology* Timothy Stabler, 2003
