Review and Reinforce

1. The bonds of matter would be pulled out or a liquid, and the matter is a gas.
2. The matter would lose the water drops because the particles in a liquid are bound together in place. The drops of the liquid will be pulled apart and into a gas-like because the particles in a liquid have spread out little. The drops of the matter would continue to change and spread out little because the particles in a gas move apart in many different directions.
3. Since the bonds of matter are pulled, the volume would stay the same. The volume of the liquid will be pulled out the same. The volume of the matter would expand to fill the size of the larger container because the particles would spread apart.
4. Matter with a definite volume and a definite shape.
5. Matter with a definite volume but no shape will be very.
6. Matter with a definite shape or volume.
7. The molecules of a liquid in flowing.
8. It is called in which the particles are not arranged in a regular pattern.
9. It is called in which the particles are arranged in a regular repeating pattern.
10. A substance that flows.
11. The bonds of an ionic solid among the molecules of a liquid that bring surface molecules closer together.
