Doing Text Pete Bennett, Julian McDougall, 2017-02-14 This collection reimagines the study of English and media in a way that decentralises the text e.g. romantic poetry or film noir or media formats platforms e.g. broadcast media new media Instead the authors work across boundaries in meaningful thematic contexts that reflect the ways in which people engage with reading watching making and listening in their textual lives In so doing this project recasts both subjects as combined in a more reflexive critical space for the study of our everyday social and cultural interactions Across the chapters the authors present applicable learning and teaching strategies that weave together art works films social practices creativity viral media theater TV social media videogames and literature The culmination of this range of strategies is a reclaimed blue skies approach to progressive textual education free from constraining shackles of outdated ideas about textual categories and value that have hitherto alienated generations of students and both English and media from themselves **Encyclopedia of Computer Graphics and Games** Newton Lee, 2024-01-10 Encyclopedia of Computer Graphics and Games ECGG is a unique reference resource tailored to meet the needs of research and applications for industry professionals and academic communities worldwide The ECGG covers the history technologies and trends of computer graphics and games Editor Newton Lee Institute for Education Research and Scholarships Los Angeles CA USA Academic Co-Chairs Shlomo Dubnov Department of Music and Computer Science and Engineering University of California San Diego San Diego CA USA Patrick C K Hung University of Ontario Institute of Technology Oshawa ON Canada Jaci Lee Lederman Vincennes University Vincennes IN USA Industry Co-Chairs Shuichi Kurabayashi Cygames Inc FORTH ICS Heraklion Greece University of Crete Heraklion Greece Florian Richoux Nantes Atlantic Computer Science Laboratory LINA Universit de Nantes Nantes France Andrea

Teaching the Middle Ages through Modern Games Robert Houghton,2022-10-24 Games can act as invaluable tools for the teaching of the Middle Ages The learning potential of physical and digital games is increasingly undeniable at every level of historical study These games can provide a foundation of information through their stories and worlds They can foster understanding of complex systems through their mechanics and rules Their very nature requires the player to learn to progress The educational power of games is particularly potent within the study of the Middle Ages These games act as the first or most substantial introduction to the period for many students and can strongly influence their understanding of the era Within the classroom they can be deployed to introduce new and alien themes to students typically unfamiliar with the subject matter swiftly and effectively They can foster an interest in and understanding of the medieval world through various innovative means and hence act as a key educational tool This volume presents a series of essays addressing the practical use of games of all varieties as teaching tools within Medieval Studies and related fields In doing so it provides examples of the use of games at pre university undergraduate and postgraduate levels of study and considers the application of commercial games development of bespoke historical games use of game design as a learning process and use of games outside the classroom As such the book is a flexible and diverse pedagogical resource and its methods may be readily adapted to the teaching of different medieval themes or other periods of history *The Elder Scrolls V* Clyde S Ratliff,2024-09-06 Welcome to The Elder Scrolls V Skyrim Anniversary Edition Complete Game Guide Whether you re a

Time in Variance Arkadiusz Misztal, Paul A. Harris, Jo Alyson Parker, 2021-09-20. This interdisciplinary volume of essays explores how the notion of time varies across disciplines by examining variance as a defining feature of temporalities in cultural, creative, and scholarly contexts. Featuring a President's Address by philosopher David Wood, it begins with critical reassessments of J. T. Fraser's hierarchical theory of time through the lens of Anthropocene studies, philosophy, ecological theory, and ecological literature. It proceeds to variant narratives in fiction, video games, film, and graphic novels, and concludes by measuring time's variance with tools as different as incense clocks and computers, and by marking variance in music, film, and performance art.

American/Medieval Goes North Gillian R. Overing, Ulrike Wiethaus, 2019-10-07. One of the great virtues of *American/Medieval Goes North* is its wide range of contributors with fascinatingly diverse relationships to the main terms of analysis. There are academic scholars, poets, filmmakers, tribal elders, teachers at various levels; there are Indigenous people, people from settler colonial cultures, expats, immigrants. Their analytic and imaginative encounters with the North catch at the intensely symbolic and political charge of that locus. At a time when Medieval Studies cannot afford to ignore the period's popular uptake, cannot continue with business as usual in the face of white supremacists' brazen appropriations of the Middle Ages, this volume points to new possibilities for grappling with the uneasy relationships between the American and the medieval. Prof. Carolyn Dinshaw, New York University.
