Western world yet at the same time government budgets face increasing constraints This has ensured that the importance of student support is recognized in many countries In recent years there has been a world wide movement towards the use of income contingent loans ICL for higher education ICLs are now used in six countries following the Australian innovation of 1989 with the governments of many more countries looking very seriously at the model This impressive new book by Bruce Chapman analyzes ICLs particularly their use in supporting students exploring the experiences of a number of other countries adopting them Chapman presents analysis of a number of disparate case studies to illustrate how ICLs can aid risk management policy reforming in both progressive and administratively feasible ways This book describes examines and promotes an exciting new role for the public sector as a manager of risk and argues that ICLs have enormous potential to change the extent and nature of social and economic activities With the author s experience in the design and implementation of the Australian student financial support schemes this is a knowledgeable informative and enlightening book that will be useful to researchers students and policy makers alike

*Cost-sharing and Accessibility in Higher Education: A Fairer Deal?* Pedro N. Teixeira,D. Bruce Johnstone,Maria J. Rosa,Hans Vossensteyn,2007-11-23 Higher education finances lie at the crossroads in many Western countries Hence worldwide the most common approach to the need for increasing revenue was to use some form or forms of cost sharing or the shift of some of the higher educational per student costs from governments and taxpayers to parents and students This raises several important challenges to higher education systems First there is the political and social controversy associated with most forms of cost sharing particularly with tuition fees Secondly there are important issues in terms of the broad context of social policy such as the role of families and students and the relationship that the state establishes with each of them Third there is the comparison of alternative instruments of cost sharing and the direct and indirect effects of each of them notably in terms of educational equality Overall underlying cost sharing debates are fundamental questions about social choice individual opportunities and the role of government in society

**National Policy & a Regional Response in South African Higher Education** Nico Cloete,2004 This study looks at measures taken in the Eastern Cape to provide the higher educational institutions in a region of high poverty and high unemployment with strategic co operation scenarios for post school education Fort Hare College Rhodes University two of South Africa s historic institutions of higher education are both in the Eastern Cape book cover

*Transforming Transformation in Research and Teaching at South African Universities* Rob Pattman,2018-12-20 What is transformation in contemporary South African higher education How can it be facilitated through research and pedagogic practices These questions are addressed in this edited collection by established academics and emerging research students from nine South African universities The chapters give us access to students worlds how they construct experience and navigate their complex spheres on and off campus

**University Access and Success** Merridy Wilson-Strydom,2015-02-11 The challenge of widening access and participation in higher education in a manner that ensures students are successful in

their studies is a major issue globally and a significant research focus within higher education studies and higher education policy. Similarly, the challenge of under preparedness of students entering higher education has become increasingly pertinent as universities in both developed and developing countries struggle to improve their throughput rates in a context in which schooling no longer seems to provide sufficient preparation for entering university. In this book, Merridy Wilson Strydom applies the capabilities approach to better understand university access and participation and draws on a rich case study from South Africa to critically and innovatively explore the complex and contradictory terrain of access with success. The book integrates quantitative and qualitative research with theory and practical application to provide a new framework for considering and improving the transition from school to university. *University Access and Success* will appeal to academics and researchers in the field of higher education internationally. The book also contributes to the growing body of international and comparative scholarship on the capabilities approach in higher education and will therefore be of value to higher education practitioners such as those working in the promotion of teaching and learning, higher education quality assurance, institutional research and student affairs. *Youth In South Africa* Ariane De Lannoy, Malose Langa, 2021-05-05

South Africa is characterised by a youthful population and the challenges and possibilities that characterise the young generation are both warning signs and beacons of hope for a nation founded on social justice. Youth in South Africa Agency in visibility and national development takes stock of the nation's development as it affects young people. Authors offer both personal and professional insights into the ways in which the youth navigate their own pathways to adulthood. These include formal and informal engagements with politics as well as protest, unemployment, entrepreneurship, education, religion, experiences with sexuality and violence and a multitude of other life experiences. Contributors paint a picture of the initiative, agency and resilience of the youth as well as the challenges before them. Authors also identify the state of wait-hood faced by those unable to make the transition out of youth into full adulthood as a result of their socio-economic circumstances and political context. By engaging these experiences and insights and primarily informed by the inputs of young people, the authors highlight the limitations of existing youth policies and frameworks. The case is made for policy instruments to be informed by the lived experiences of the youth as they navigate a complex macrosocial environment and by the messages the youth communicate about the limitations of current approaches. **Students with Disabilities and the Transition to**

**Work** Oliver Mutanga, 2019-07-01 This book sets out to understand how students with disabilities experience higher education and the transition to the workplace. It foregrounds the voices of students and graduates in order to explore identity, inclusion, participation and success of youth with disabilities in higher education as well as their transition from university to employment. The author proposes a new understanding of disability considered in terms of a continuum of abilities, balancing empirical data, theory and policy analysis with specific regard to the interests of youth with disabilities, making a unique contribution to discussions on access, inclusion and success in higher education and employment. These discussions inform

social development and educational policy planning and implementation not only in South Africa but also in countries with a similar context particularly in terms of remedial courses of action that bring social justice to people with disabilities Students with Disabilities and the Transition to Work will be of interest to all scholars and students working in the fields of disability studies particularly those with a focus on critical disability studies and disability in the global south as well as those working in higher education sociology development studies and social policy
