September 8 - September 24 Notes

AEGEAN CIVILIZATION: C. 2000 to 1200 BCE wiped out by a volcano

The Minoans, (2000 to 1450 BCE) lived on the island of Crete in the Mediterranean Sea. Had a hereditary king (allowed the people to come and live with him at a time of attack), and they were loving people who made a living through agriculture and trade.

The Myceneans lived on Mycenea (present-day Mainland), city-state, they were pirates and thieves who made a living by stealing. They lived in the Lion Gate Palace which was designed to be a fortress, angry looking, broken, not attractive. They used a "honey-comb" construction where you could pull out a stone from the walls in the palace to hide the items they stole.

Western Civilization 2 Test Questions True False:

Constructing Test Items Steven J. Osterlind, 1997-12-31 Constructing test items for standardized tests of achievement ability and aptitude is a task of enormous importance. The interpretability of a test's scores flows directly from the quality of its items and exercises. Concomitant with score interpretability is the notion that including only carefully crafted items on a test is the primary method by which the skilled test developer reduces unwanted error variance or errors of measurement and thereby increases a test score's reliability. The aim of this entire book is to increase the test constructor's awareness of this source of measurement error and then to describe methods for identifying and minimizing it during item construction and later review. Persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years. Yet in many writers' zeal to be curriculum relevant or authentic or realistic, the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them. This book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions as one chapter is devoted to these alternative formats. This book addresses major issues in constructing test items by focusing on four ideas. First, it describes the characteristics and functions of test items. A second feature of this book is the presentation of editorial guidelines for writing test items in all of the commonly used item formats including constructed response formats and performance tests. A third aspect of this book is the presentation of methods for determining the quality of test items. Finally, this book presents a compendium of important issues about test items including procedures for ordering items in a test, ethical and legal concerns over using copyrighted test items, item scoring schemes, computer-generated items, and more. *The Process of Group Thinking* Harrison Sackett Elliott, 1928 **Im/Tb West Civl** Spielvogel, 2004-02

What Brain Research Can Teach About Cutting School Budgets Karen D. Olsen, 2010-02-18 Karen Olsen has put budget topics into perspective so that school administrators can make decisions based on what is best for children, not what is easiest and most efficient for adults. This book is a powerful guide in helping our principals see through the fog of mandates, policies, and red tape and get to the priority of students. Terri Patterson, Director of Elementary Education, Waco Independent School District, TX. This book boldly asserts that brain research should be applied wherever human brains are working. Not only can and should brain research inform how and what we teach in the classroom, it should be brought to bear in boardrooms and the school budgeting process as well. Linda Jordan, Associate Professor, Hope College. Make objective budget-cutting decisions that will truly impact student achievement. In tough economic environments, budget cutting is a daunting but necessary task for many school administrators. Karen D. Olsen takes an exciting, unique approach by applying brain research to budgeting. Now educators can make the decision-making process more objective by using analytical thinking in school budgeting rather than responding to emotion, tradition, or outside influences. Providing a strategy builder chart, this book offers action items for putting the strategies into practice. Helps leaders determine where money should be

reinvested or reallocated Provides specific tips for working within a group decision making setting Includes more than 30 analytical charts to aid in gathering needed information What Brain Research Can Teach About Cutting School Budgets offers principals and district leaders a methodical process for taking subjectivity out of the budgeting process Cracking the SAT U.
