What Are The Characteristics Of An Rme Syllabus

Richard Lehrer, Daniel Chazan

What Are The Characteristics Of An Rme Syllabus:

Evidence-based Approaches to Relationship and Marriage Education James J. Ponzetti, Jr., 2015-07-16 This is the first book to provide a comprehensive multidisciplinary overview of evidence based relationship and marriage education RME programs Readers are introduced to the best practices for designing implementing and evaluating effective RME programs to better prepare them to teach clients how to have healthy intimate relationships Noted contributors from various disciplines examine current programs and best practices often by the original developers themselves Readers learn to critically appraise approaches and design and implement effective evidence based programs in the future Examples and discussion questions encourage readers to examine issues and apply what they have learned The conceptual material in Parts I II provides critical guidance for practitioners who wish to develop implement and evaluate RME programs in various settings Chapters in Parts III IV follow a consistent structure so readers can more easily compare programs program overview and history theoretical foundations needs assessment and target audience program goals objectives curriculum issues cultural Implications evidence based research and evaluation and additional resources This book reflects what the editor has learned from teaching relationship development and family life education courses over the past decade and includes the key information that students need to become competent professionals Highlights of the book s coverage include Comprehensive summary of effective evidence based RME training programs in one volume Prepares readers for professional practice as a Certified Family Life Educator CFLE by highlighting the fundamentals of developing RME programs Describes the challenges associated with RME program evaluation The book opens with a historical overview of RME development It is followed by 20 chapters divided in six parts The initial four chapters focus on fundamentals of relationship and marriage education program development required training delivery systems and implementation The three chapters in Part II consider important conceptual and theoretical frameworks used in RME Part III considers best practices in inventory based programs while Part IV examines six skills based programs The chapters in Parts III and IV consider program overview and history theoretical foundations needs assessment and target audience program goals and objectives curriculum issues cultural implications evidence based research evaluation and additional resources This content covers four categories of effective programs design and content relevance delivery and implementation and assessment and quality assurance Part V presents evidence based RME with diverse groups and Part VI reviews future directions Intended for use in advanced undergraduate or graduate courses in relationship and marriage education family life education marriage and relationship counseling therapy intimate relationships relationship development or home school community services taught in human development and family studies psychology social work sociology religion and more this ground breaking book also serves as a resource for practitioners therapists counselors clergy members and policy makers interested in evidence based RME programs and those seeking to become Certified Family Life Educators or preparing for a career in RME Research on e-Learning and ICT in

Education Charalampos Karagiannidis, Panagiotis Politis, Ilias Karasavvidis, 2014-08-07 An essential text for researchers and academics seeking the most comprehensive and up to date coverage of all aspects of e learning and ICT in education this book is a multidisciplinary forum covering technical pedagogical organizational instructional and policy aspects of the topic Representing the best peer reviewed papers from the 8th Panhellenic Conference on ICT in Education special emphasis is given to applied research relevant to educational practice and guided by the educational realities in schools colleges universities and informal learning organizations The volume encompasses the current trends and issues which determine and inform the integration of ICT in educational practice including educational software educational games collaborative learning virtual learning environments social networks learning analytics digital museums as well as the evolution of e learning

Designing Learning Environments for Developing Understanding of Geometry and Space Richard Lehrer, Daniel Chazan, 2012-11-12 This volume reflects an appreciation of the interactive roles of subject matter teacher student and technologies in designing classrooms that promote understanding of geometry and space Although these elements of geometry education are mutually constituted the book is organized to highlight first the editors vision of a general geometry education second the development of student thinking in everyday and classroom contexts and third the role of technologies Rather than looking to high school geometry as the locus and all too often the apex of geometric reasoning the contributors to this volume suggest that reasoning about space can and should be successfully integrated with other forms of mathematics starting at the elementary level and continuing through high school Reintegrating spatial reasoning into the mathematical mainstream indeed placing it at the core of K 12 mathematics environments that promote learning with understanding will mean increased attention to problems in modeling structure and design and reinvigoration of traditional topics such as measure dimension and form Further the editors position is that the teaching of geometry and spatial visualization in school should not be compressed into a characterization of Greek geometry but should include attention to contributions to the mathematics of space that developed subsequent to those of the Greeks This volume is essential reading for those involved in mathematics education at all levels including university faculty researchers and graduate students School Mathematics

Curricula Catherine P. Vistro-Yu, Tin Lam Toh, 2019-04-26 This book sheds light on school mathematics curricula in Asian countries including their design and the recent reforms that have been initiated By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries unique approaches to supplementing school mathematics curricula it contributes to shaping effective policies for implementation assessment and monitoring of curricula The book covers a wide range of issues curriculum design localization of curricula directions of curricular reforms mathematics textbooks assessment within the curriculum and teachers professional development which are of interest to a wide international audience **Interfaith**

Education for All Duncan R. Wielzen, Ina Ter Avest, 2017-10-10 Living together in the midst of diversity is an issue of pivotal

importance all over the world in particular for people involved in the education of the younger generation The search intended in this publication is to find the means to go beyond mere tolerance of differences Education as envisioned in this book engages learners in active citizenship and enables pupils and students young people to transform their social environment Learning about the other and to a certain extent appreciating the other s perspective together with acquiring dialogical skills are key elements for learning to live together with people from different cultural backgrounds and with diverse religious and secular worldviews Hence faith development dialogicality and citizenship are central themes in this publication This book brings together the latest insights and best practices available in the fields of religious education from around the world which are reflected upon by distinguished scholars in the field The input provided by the three parts of this book will give every educator further food for thought be it in the classroom at home or in leisure activities The diversity approach of this book is mirrored in the composition of the team of editors Duncan Wielzen is a theologian with research interest in religious education in plural societies Ina Ter Avest is a psychologist with a focus on the intersectionality of psychology culture and religion The focus of both editors is on inter faith education its implication and further development

Amongst Mathematicians Elena Nardi,2008 This book offers a unique perspective on ways in which mathematicians perceive their students learning teach reflect on their teaching practice Elena Nardi achieves this by employing two fictional yet entirely data grounded characters to create a conversation on these important issues The construction of these characters is based on large bodies of data including intense focused group interviews with mathematicians and extensive analyses of students written work collected and analyzed over a substantial period **South African Journal of Higher Education** ,2008 RME ,1952 **Teacher in Zimbabwe** ,2014 *Practicing Responsibility in Business Schools* Bjørn T.
