A Mental Health Provider's Guide to Telehealth Jonathan G. Perle, 2021-03-30 This book works as a guide to videoconferencing practice for psychological providers through a broad simplified and practical overview of pertinent factors. It is a consolidation of research literature and professional experiences of practicing teaching and studying videoconferencing. It begins by defining key concepts such as telehealth, telepsychology, and other related terminology and examining the role of telehealth in addressing ongoing mental health disparities. An overview of existing videoconferencing practices, guidebooks, and general recommendations, as well as specifics of ethical and legal factors, are discussed. The book then details numerous essential factors of videoconferencing practice that are directly applicable to psychological care, including considerations of computer system, video camera, display screen, microphone, videoconferencing platform, bandwidth, and latency, and room setup, along with self-care practices. The appendices provide readers with links to resources, checklists, and other documents to guide their practice. Psychologists, counselors, and other mental health providers will find this user-friendly, research-informed guide indispensable when implementing online treatment and teletherapy.

Psychotherapy 2.0 blows open the consulting room doors and shows successful pathways for attracting new clients to gain access to psychological help as well as demonstrating that despite initial scepticism working online as a psychotherapist or counsellor can be as effective as face2face work the therapeutic relationship may be different but it remains the centrally important feature for successful psychotherapy It follows therefore that all psychotherapists and counsellors need to be fully informed about the impact of the digital age on their clinical practice Psychotherapy 2.0 covers the key issues for psychotherapists and counsellors who are or are thinking of working online include thinking about psychotherapy in the digital age the requirements to modify training both for working online and also the digital issues as they arise within the face2face consulting room
