The Un Convention on the Elimination of All Forms of Discrimination Against Women and Its Optional Protocol Patricia Schulz, Ruth Halperin-Kaddari, Beate Rudolf, Marsha A. Freeman, 2023-01-27 This volume is the fully revised and updated version of the first comprehensive commentary on the Convention on the Elimination of All Forms of Discrimination against Women and its Optional Protocol It reflects the developments during the decade following the publication of the first edition in 2012 which has also seen a notable rise in individual complaints more than 85 ten new General Recommendations and six new inquiry procedures as well as numerous statements partly in conjunction with other UN human rights bodies The Convention is a key international human rights instrument and the only one exclusively addressed to women It has been described as the United Nations landmark treaty in the struggle for women s rights At a time when the backlash against women s human rights and the concept of gender based discrimination is increasingly challenged by governments and powerful societal actors the Commentary is an important instrument to hold all state powers to account on their international obligations under the Convention The Commentary analyses the interpretation of the Convention through the work of its monitoring body the Committee on the Elimination of Discrimination against Women It comprises detailed analyses of the Preamble and each article of the Convention and of the Optional Protocol including a separate chapter on the cross cutting substantive issue of violence against women The sources relied on are the treaty language and the general recommendations concluding observations and case law under the Optional Protocol individual complaints and inquiries through which the Committee has interpreted and applied the Convention Each chapter is self contained but the Commentary is conceived of as an integral whole The book also includes an introduction which provides an overview of the Convention and its embedding in the international law of human rights as well as the most recent challenges to women s human rights worldwide **An Introduction to Formal Languages and Automata** Linz, 2016-01-15 Data Structures Theory of Computation **Youth Language Practices in Africa and Beyond** Nico Nassenstein, Andrea Hollington, 2015-09-14 Youth languages have increasingly attracted the attention of scholars and students of various disciplines African youth languages are a vibrant phenomenon with manifold characteristics involving a range of different languages This book is a first comprehensive study of African youth languages and presents fresh insights into various youth languages providing linguistic as well as sociolinguistic data and analyses **Photons In Fock Space And Beyond (In 3 Volumes)** Reinhard Honegger, Alfred Rieckers, 2015-04-22 The three volume major reference Photons in Fock Space and Beyond undertakes a new mathematical and conceptual foundation of the theory of light emphasizing mesoscopic radiation systems The quantum optical notions are generalized beyond Fock representations where the richness of an infinite dimensional quantum field system with its mathematical difficulties and theoretical possibilities is fully taken into account It aims at a microscopic formulation of a mesoscopic model class which covers in principle all stages of the generation and propagation of light within a unified and

well defined conceptual frame The dynamics of the interacting systems is founded according to original works of the authors on convergent perturbation series and describes the developments of the quantized microscopic as well as the classical collective degrees of freedom at the same time The achieved theoretical unification fits especially to laser and microwave applications inheriting objective information over quantum noise A special advancement is the incorporation of arbitrary multiply connected cavities where ideal conductor boundary conditions are imposed From there arises a new category of classical and quantized field parts apparently not treated in Quantum Electrodynamics before In combination with gauge theory the additional cohomological fields explain topological quantum effects in superconductivity Further applications are to be expected for optoelectronic and optomechanical systems

UN Human Rights Institutions and the Environment

Sumudu Atapattu, 2023-05-22 This book presents an in depth analysis of how UN human rights institutions and mechanisms have addressed environmental protection sustainable development and climate change Despite the increasing involvement of UN human rights bodies in addressing environmental degradation and climate change a systematic review of the convergence between human rights and the environment in these bodies has not been carried out Filling this lacuna this book surveys the resolutions general comments concluding observations decisions on individual communications and press releases It identifies principles that have emerged explores the ways in which human rights charter based and treaty based institutions are interpreting environmental principles and examines how they contribute to the emerging field of human rights and the environment Given the disproportionate effect that polluting activities have on marginalized and vulnerable groups Atapattu also discusses how these human rights mechanisms have addressed the impact on women children indigenous peoples people with disabilities and racial minorities Written by a world renowned expert on human rights and the environment this book will be of great interest to students and scholars researching and teaching in this important field of study

Machine Understanding

Zbigniew Les, Magdalena Les, 2019-08-01 This unique book discusses machine understanding MU This new branch of classic machine perception research focuses on perception that leads to understanding and is based on the categories of sensory objects In this approach the visual and non visual knowledge in the form of visual and non visual concepts is used in the complex reasoning process that leads to understanding The book presents selected new concepts such as perceptual transformations within the machine understanding framework and uses perceptual transformations to solve perceptual

problems visual intelligence tests during understanding where understanding is regarded as an ability to solve complex visual problems described in the authors previous books Thanks to the uniqueness of the research topics covered the book appeals to researchers from a wide range of disciplines especially computer science cognitive science and philosophy *The Analyst*, 1876 The Analyst publishes research articles in pure mathematics *WTO Accessions and Trade Multilateralism* Uri Dadush, Chiedu Osakwe, 2015-09-10 What have WTO accessions contributed to the rules based multilateral trading system What demands have been made by original WTO members on acceding governments How have the acceding governments fared This volume of essays offers critical readings on how WTO accession negotiations have expanded the reach of the multilateral trading system not only geographically but also conceptually clarifying disciplines and pointing the way to their further strengthening in future negotiations Members who have acceded since the WTO was established now account for twenty per cent of total WTO membership In the age of globalization there is an increased need for a universal system of trade rules Accession negotiations have been used by governments as an instrument for domestic reforms and one lesson from the accession process is that there are contexts which lead multilateral trade negotiations to successful outcomes even in the complex and multi polar twenty first century economic environment **Entrepreneurship, Self-Employment and Retirement** N. Sappleton, F. Lourenco, 2015-04-16 This book presents a collection of nine studies which contribute to a more robust and richer understanding of entrepreneurship self employment and retirement in a diversity of settings including the Netherlands Canada the United Kingdom Singapore and the US by drawing on both qualitative and quantitative data **Multi-modality Cardiac Imaging** Patrick Clarysse, Denis Friboulet, 2015-06-02 The imaging of moving organs such as the heart in particular is a real challenge because of its movement This book presents current and emerging methods developed for the acquisition of images of moving organs in the five main medical imaging modalities conventional X rays computed tomography CT magnetic resonance imaging MRI nuclear imaging and ultrasound The availability of dynamic image sequences allows for the qualitative and quantitative assessment of an organ s dynamics which is often linked to pathologies **Boredom: The Elephant in the Room** Doris Sommer, Robert D. Austin, Alexandra Vuyk, David M. Ndeti, Nicolas Prevelakis, Pier Luigi Sacco, Josefa Ros Velasco, 2024-07-16 When cases of domestic violence spiked during the COVID 19 lockdowns terror spread among potential victims while governments that enforced the isolation seemed helpless to address the damages Vulnerable partners children and parents were hostage to possible perpetrators given the risks of retaliation at home and the danger of death by contamination in shelters The alarm raises questions about under examined triggers for violence against others and oneself One common trigger is boredom It is the elephant in the room a known stressor in institutional settings schools prisons and military installations and otherwise out of focus despite the ubiquity of gender based violence Detecting the ravages of boredom in apparently safe domestic settings hints at a range of meanings for the word and a web of personal and collective dysfunctions including anxiety depression feelings of worthlessness and

anomie Conventional remedies for these challenges do not address the escalating rates of violence to oneself and to others Their evident ineffectiveness during the crisis laid bare structural flaws in standard human development strategies which span home and school environments the law and approaches to mental health A major flaw has been the narrow perspectives of one or another discipline when the dangers are interrelated and demand multidisciplinary approaches Chronic violence and alarming rates of depression before during and after the pandemic show failures of predictable perspectives and their recommendations even in normal conditions The question of how authorities should react to harm done begs the question of how to prevent harm from happening Prevention rather than punishment for crimes or treatment for pathologies has become a preferred approach for both legal and clinical interventions To stop violence before it erupts requires investigation into its causes because treating the effects of aggression evacuating victims punishing perpetrators counselling patients addresses symptoms rather than diseases Why was the lockdown a time of increased domestic violence What accounts for recent spikes in teen suicides What are the existing and possible tools for measuring boredom Answers from experts stay within foreseeable observations about the loss of jobs the increase of alcoholism social media addiction and psychological stress These familiar answers do not lead beyond the description of pathological patterns But different approaches may follow from attending to the under examined danger of having nothing to do
