The Publishers' Trade List Annual, 1983 **A Guide to a Multi-Domain Model of Living and Education** David Carter, 2024-06-21 Navigating the complexities of school life can be a daunting task for young people, educators and parents alike. This book aims to provide practical guidance and insights to those who find themselves struggling in the educational landscape. While grounded in academic theory and evidence-based research, the primary focus of this book is on offering

tangible solutions and real world examples Through a series of stories vignettes and problem solving scenarios the authors explore the challenges faced by students teachers and parents from various perspectives By delving into these narratives readers are likely to find answers to the questions that prompted them to pick up this book in the first place The authors propose a model for change called the Multidomain Model of Education and Living MDM which aims to facilitate and enhance collaborative relationships between home and school as well as within these two domains Rather than advocating for sweeping top down changes that are often met with resistance the MDM offers a flexible framework that can be adapted in part or in its entirety to suit the unique needs of each school community The authors draw upon their own experiences in the Irish education system to illustrate how these ideas can be further developed and implemented By inviting parents guardians pupils and school staff to consider incorporating elements of the MDM into their own schools the book serves as a catalyst for meaningful dialogue and incremental change Ultimately the authors believe that lasting transformation in Irish education will not come from above or below but rather from the middle where people come together to engage in open and constructive conversations This book is a vital contribution to that ongoing dialogue **Cumulated Index Medicus** ,1994
