Official Airline Guide, 1972 *Annual Review of Comparative and International Education 2022* Alexander W. There has been a resurgence of interest in training programmes for higher education leaders and management HELM at African universities in recent times Although there have been a few cases of evaluation studies of such programmes in Africa a more systematic review of the lessons learnt through these programmes has not been done This book aims to document and reflect on the learnings from intervention programmes at three African higher education councils It is clear that university leaders face many leadership and management challenges This is the starting point of the book Knowledge Production and Contradictory Functions in African Higher Education Nico Cloete, Peter Maassen, 2015-03-01 The dominant global discourse in higher education now focuses on world class universities inevitably located predominantly in North America Europe and increasingly East Asia The rest of the world including Africa is left to play catch up But that discourse should focus rather on

the tensions even contradictions between excellence and engagement with which all universities must grapple Here the African experience has much to offer the high participation and generously resourced systems of the so called developed world This book offers a critical review of that experience and so makes a major contribution to our understanding of higher education
