from what experts do While many have used these results as a starting point for teaching students how to be expert the author has chosen instead to ask about the interrelationship between expert and novice practice seeing them both as two sides of the same project a cultural historical professionalization project aimed at establishing and preserving the professional privilege The consequences of this professionalization project are examined using the discipline of academic philosophy as the site for the author s investigations Methodologically unique these investigations combine rhetorical analysis protocol analysis and the analysis of classroom discourse The result is a complex portrait of how the participants in this humanistic discipline use their academic literacy practices to construct and reconstruct a great divide between expert and lay knowledge This monograph thus extends our current understanding of the rhetoric of the professions and examines its implications for education **University Catalog** University of Northern Iowa,1994 **Drawing Shortcuts** Jim
