Dante's Education Filippo Gianferrari, 2024-06-25 In fourteenth century Italy literacy became accessible to a significantly larger portion of the lay population allegedly between 60 and 80 percent in Florence and provided a crucial means for the vernacularization and secularization of learning and for the democratization of citizenship Dante Alighieri s education and oeuvre sit squarely at the heart of this historical and cultural transition and provide an ideal case study for investigating the impact of Latin education on the consolidation of autonomous vernacular literature in the Middle Ages a

fascinating and still largely unexamined phenomenon On the basis of manuscript and archival evidence Gianferrari reconstructs the contents practice and readings of Latin instruction in the urban schools of fourteenth century Florence It also shows Dante s continuous engagement with this culture of teaching in his poetics thus revealing his contribution to the expansion of vernacular literacy and education The book argues that to achieve his unprecedented position of authority as a vernacular intellectual Dante conceived his poetic works as an alternative educational program for laypeople who could read and write in the vernacular but had little or no proficiency in Latin By reconstructing the culture of literacy shared by Dante and his lay readers Dante s Education shifts critical attention from his legacy as Italy s national poet and a great books author in the Western canon to his experience as a marginal intellectual engaged in advancing a marginal culture **The Strategic Teacher** Harvey F. O'Grady, 2014-04-08 The focus of this book is on the ways in which service learning and multicultural education can and should be integrated so that each may be strengthened and consequently have greater effect on educational and social conditions It offers a significant attempt to forge a dialogue among practitioners of service learning and multicultural education The overriding theme is that service learning without a focused attention to the complexity of racial and cultural differences can reinforce the dominant cultural ideology but academic work that seeks to deconstruct these norms without providing a community based touchstone isolates students and schools from the realities of the larger communities of which they are part Although the chapter authors provide varied perspectives on the benefits and challenges of integrating multicultural education and service learning they all are committed to a vision of education that synthesizes both action and reflection None of the authors pretend to have all the answers to what this integration should look like nor do they believe that today s social problems are easily ameliorated through education Rather they share theories practices failures and triumphs in order to further the conversation about the importance of aligning what educators say about the world and how they act in and on it These authors share the view that multicultural education is truly transformative for students only when it includes a community action component and likewise service learning is truly a catalyst for change only when it is done from a multicultural and socially just perspective It is their hope that the ideas explored in this book will further the work of those who share a commitment to the integration of action and reflection **Educational Times** ,1916
