*When Teaching Writing Gets Tough* Annamary Consalvo, Ann D. David, 2024. Writing instruction is a particular challenge because there is no singular linear solution to teaching students to write well. This book approaches writing as a wicked problem that takes place in complicated contexts. Through both scholarly research and teacher reflection, it examines ELA classrooms and the experiences of writing teachers to identify approaches that have proven effective with adolescents. The book uses wickedity to frame the problems of teaching writing and offers context-specific solutions enacted by teachers. While it addresses the realities of standardized ways of teaching and assessing writing, the book also highlights the deep professional knowledge and practical strategies teachers bring to writing instruction in middle and high school classrooms. Chapters grapple with tensions between testing and authenticity, assessing writing in nuanced ways, and finding enjoyment in the work of teaching writing amid and alongside persistent complexities. Specific topics include students' writing process, revision, students as decision makers, multimodal writing, assessment, and writer's notebooks. Data-driven instruction, the high school to college transition, and teacher professional development. **Book Features:** Includes examples of how teachers approach specific challenges associated with teaching writing to adolescents; analyzing how and why their solutions proved effective. Focuses on students engaged in writing in classrooms; teachers implementing writing strategies and professional learning. Offers a range of relevant voices on the topic of writing instruction with authors that include classroom teachers and scholars. The Testing Trap George Hillocks, 2002-04-12. Do statewide assessments really do what they are supposed to do? Through interviews with over three hundred teachers and administrators, Hillocks examines whether state writing tests in Illinois, Kentucky, Oregon, New York, and Texas actually improve students' ability to express their thinking in writing. Ultimately, Hillocks argues that the majority of existing tests actually have a harmful effect on the way students are taught to write. In addition to providing analyses of assessments that do not encourage good writing, *The Testing Trap* contrasts them to those that do. Concluding with practical procedures for examining and evaluating writing assessments, this book is a provocative

and essential read for administrators teachers policymakers parents and all who care about the education of our children
