

Peppered Moth Game

Objective: Simulate changes in moth population due to pollution and predation, and observe how species can change over time.

Go to: <https://askabiologist.asu.edu/peppered-moths-game/play.html> and read each section before you play the game, answer the questions as you go.

Peppered Moth

1. Where do peppered moths live? England, Europe, and North America.
2. How do the moth larvae survive predators? They survive predators because they look like a small branch.
3. What do the moths do during the winter? The change into pupae (cocoons).
4. What color is the "typical" version of the moths? They are light.
What color is the "carbonaria" version? dark, almost black, bodies.
5. How do adult moths survive predation? They fly at night and rest during the day to avoid predators.

Natural Selection

6. What was the industrial revolution? Factories were being built, and they ran by burning coal for fuel. The result was a dark smoke that covered the surrounding countryside.
7. What was causing the change in the color of the moths? Some were changing to match the color of branches, chemicals in the smoke darkened the moths.
8. What is natural selection? All types of living things have small differences between the individuals in the species, and over time a species can be changed after offspring.
9. Why would dark moths have an advantage? Dark moths live longer in a dark forest, so they had more time to breed.

Dr. Kettlewell

10. What is an entomologist? A scientist who studies insects.
11. How do scientists test theories? They make predictions based on the theory. They then test the prediction to see if what they observe matches their expectations.
