[The Technical Delusion](#) Jeffrey Sconce, 2019-01-17 Delusions of electronic persecution have been a preeminent symptom of psychosis for over two hundred years In The Technical Delusion Jeffrey Sconce traces the history and continuing proliferation of this phenomenon from its origins in Enlightenment anatomy to our era of global interconnectivity While psychiatrists have typically dismissed such delusions of electronic control as arbitrary or as mere reflections of modern life Sconce demonstrates a more complex and interdependent history of electronics power and insanity Drawing on a wide array of psychological case studies literature court cases and popular media Sconce analyzes the material and social processes that have shaped historical delusions of electronic contamination implantation telepathy surveillance and immersion From the age of telegraphy to contemporary digitality the media emerged within such delusions to become the privileged site for imagining the merger of electronic and political power serving as a paranoid conduit between the body and the body politic Looking to the future Sconce argues that this symptom will become increasingly difficult to isolate especially as remote and often secretive powers work to further integrate bodies electronics and information

Mobile Persuasion Design Aaron Marcus, 2015-11-03 Mobile Persuasion Design presents ten conceptual design projects or Machines for new mobile applications smartphone or tablet with Web portals that combine theories of persuasion and information design to change people's behaviour Areas such as the environment health learning and happiness are explored looking at ways of

marrying people's wants and needs to make simple usable and desirable mobile applications. A user-centred design approach has been used adopting user experience UX methods in depth case studies and market analysis to see what a modern user needs from their mobile application. By applying concepts like persuasion theory and information architecture try to find ways to satisfy these needs and positively change their user habits. In 2011 the Green Health and Money Machines won design awards in an international competition hosted by the International Institute for Information Design Vienna.

App Use and Patient Empowerment in Diabetes Self-Management Nicola Brew-Sam, 2020-02-03

Patient empowerment is examined as a multi-dimensional factor influencing the use of diabetes self management apps. The research design includes three studies conducted in Singapore. Study 1 examines how features of diabetes self management apps correspond with theoretical indicators of empowerment as well as app quality. Study 2 uses semi structured face to face interviews with diabetes patients to draw first conclusions about the relevance of empowerment for diabetes app use. Study 3 includes an online patient survey and uses cluster analytical methods to test the preliminary Study 2 results. Typology of app use as well as binary logistic regression to compare the strength of influence of various antecedent factors on the likelihood of diabetes app use. The studies show that especially the support by private social patient networks and the medical specialties of supervising physicians play a crucial role for technology supported self management.
