Technical Analysis Course In Chennai:

Nonlinear Functional Analysis: A First Course S. Kesavan, 2022-06-04 The book discusses the basic theory of topological and variational methods used in solving nonlinear equations involving mappings between normed linear spaces It is meant to be a primer of nonlinear analysis and is designed to be used as a text or reference book by graduate students Frechet derivative Brouwer fixed point theorem Borsuk's theorem and bifurcation theory along with their applications have been discussed Several solved examples and exercises have been carefully selected and included in the present edition The prerequisite for following this book is the basic knowledge of functional analysis and topology

Antenna Design for Narrowband IoT: Design, Analysis, and Applications Pattanaik, Balachandra, Saravanan, M., Saravanakumar, U., T R, Ganesh Babu, 2022-03-11 In internet of things IoT applications wireless connectivity is a key factor particularly those that need to be in transition or where wired communication is not effective or practicable For top notch connectivity of the Narrowband IoT NB IoT standard the 900MHz frequency is generally used by most of the vendors The radiation quality not only depends on the antenna geometry but on immediate surroundings Additionally the IoT product itself and the user of the product can strongly affect the resulting radiation pattern and other characteristics of the antenna On the other hand a suitable antenna should also have high efficiency and adequate bandwidth covering the desired frequency range To take these effects into consideration the whole IoT product must be included in the antenna simulations Antenna Design for Narrowband IoT Design Analysis and Applications provides the antenna design concept for narrowband internet of things applications performs a detailed analysis of the antenna and discusses the various antenna design concepts and structures Covering a range of topics such as antenna design and antenna measurement systems this book is ideal for industry professionals research scholars academicians professors and students

Analysis I Terence Tao, 2023-02-22 This is the first book of a two volume textbook on real analysis Both the volumes Analysis I and Analysis II are intended for honors undergraduates who have already been exposed to calculus The emphasis is on rigor and foundations The material starts at the very beginning the construction of number systems and set theory Analysis I Chaps 1-5 then on to the basics of analysis such as limits series continuity differentiation and Riemann integration Analysis I Chaps 6-11 on Euclidean spaces and Analysis II Chaps 1-3 on metric spaces through power series several variable calculus and Fourier analysis Analysis II Chaps 4-6 and finally to the Lebesgue integral Analysis II Chaps 7-8 There are appendices on mathematical logic and the decimal system The entire text omitting some less central topics is in two quarters of twenty five to thirty lectures each

Functional Analysis S. Kesavan, 2023-02-27 This second edition is thoroughly revised and includes several new examples and exercises Proofs of many results have been rewritten for a greater clarity While covering all the standard material expected of such a course efforts have been made to illustrate the use of the topics to study differential equations and calculus of variations The book includes a chapter on weak topologies and their applications It also includes a chapter on the

Lebesgue spaces which discusses Sobolev spaces The book includes a chapter on compact operators and their spectra especially for compact self adjoint operators on a Hilbert space Each chapter has a large collection of exercises in the end which give additional examples and counterexamples to the results given in the text This book is suitable for a first course in functional analysis for graduate students who wish to pursue a career in the applications of mathematics **Analysis II** Terence Tao,2023-02-22 This is the second book of a two volume textbook on real analysis Both the volumes Analysis I and Analysis II are intended for honors undergraduates who have already been exposed to calculus The emphasis is on rigor and foundations The material starts at the very beginning the construction of number systems and set theory Analysis I Chaps 1 5 then on to the basics of analysis such as limits series continuity differentiation and Riemann integration Analysis I Chaps 6 11 on Euclidean spaces and Analysis II Chaps 1 3 on metric spaces through power series several variable calculus and Fourier analysis Analysis II Chaps 4 6 and finally to the Lebesgue integral Analysis II Chaps 7 8 There are appendices on mathematical logic and the decimal system The entire text omitting some less central topics is taught in two quarters of twenty five to thirty lectures each **Financial Accounting: for B. Decision-Making Techniques and Methods for Sustainable Technological Innovation Kanak Kalita,J. V. N. Ramesh,M. Elangovan,S. Balamurugan,2025-10-02 This book is an essential guide for anyone looking to drive sustainable technological innovation providing a comprehensive toolkit of decision making methods and real world applications to effectively manage technology in the era of Industry 5 0 Sustainable technological innovation is critical for building a more sustainable future As the world faces increasing environmental challenges there is a pressing need for new and innovative technologies that can reduce resource consumption mitigate environmental impacts and promote sustainable development This book focuses on the vital role of decision making processes in achieving sustainability through technological innovation in the context of Industry 5 0 By delving into various decision making methods and approaches employed to facilitate sustainable technological innovation across essential industries such as manufacturing agriculture and energy the book will present both theoretical and applied research on managing technology including decision making connected to Industry 4 0 and 5 0 artificial intelligence and other revolutionary techniques The book covers a wide range of topics including multiple attribute decision theory multiple objective decision making patent mining big data analytics and other decision making methods and techniques and features case studies and reviews that highlight real world applications of sustainable technological innovation in different industries The exploration of various decision making methods and approaches for sustainable technological innovation makes this book an essential guide for those looking toward a sustainable Industry 5 0 Readers will find the book Emphasizes the role of decision making processes in enabling sustainable technological innovation providing a unique perspective on the subject Covers a wide range of topics related to decision making for sustainable technological innovation including decision theory multiple attribute and objective decision making patent mining big data

analytics and case studies Provides real world examples and case studies that demonstrate the effectiveness of decision making processes in promoting sustainable technological innovation across various industries Features the latest research and developments in the field ensuring that readers are up to date on the most current thinking on decision making for sustainable technological innovation Audience Researchers practitioners and students in the fields of computer science data science engineering and mathematics specifically interested in decision analytics and machine learning algorithms

Deep Learning in Medical Image Analysis R. Indrakumari,T. Ganesh Kumar,D. Murugan,Sherimon P.C.,2024-07-10 This book is designed as a reference text and provides a comprehensive overview of conceptual and practical knowledge about deep learning in medical image processing techniques The post pandemic situation teaches us the importance of doctors medical analysis and diagnosis of diseases in a rapid manner This book provides a snapshot of the state of current research between deep learning medical image processing and health care with special emphasis on saving human life The chapters cover a range of advanced technologies related to patient health monitoring predicting diseases from genomic data detecting artefactual events in vital signs monitoring data and managing chronic diseases This book Delivers an ideal introduction to image processing in medicine emphasizing the clinical relevance and special requirements of the field Presents key principles by implementing algorithms from scratch and using simple MATLAB Octave scripts with image data Provides an overview of the physics of medical image processing alongside discussing image formats and data storage intensity transforms filtering of images and applications of the Fourier transform three dimensional spatial transforms volume rendering image registration and tomographic reconstruction Highlights the new potential applications of machine learning techniques to the solution of important problems in biomedical image applications This book is for students scholars and professionals of biomedical technology and healthcare data analytics

Ground Engineering and Applications T. Thyagaraj,P. T. Ravichandran,G. Janardhanan,S. Bhuvaneshwari,M. Muttharam,V. B. Maji,2025-05-14 This volume presents the select proceedings of the 8th Indian Young Geotechnical Engineers Conference 8IYGEC 2021 on the following conference themes Ground Improvement and Transportation Geotechnics The papers in this volume cover a wide range of topics on ground improvement which include the modification using different synthetic and natural materials and inclusions in the form of fibers geotextiles geogrids prefabricated vertical drains and soil nails in different ground improvement applications and chemical modification of problematic soils using both natural additives and industrial by products such as lime cement calcium chloride calcium carbide lignosulphonate fly ash blast furnace slag and bioenzymes treatment of expansive soils with granular piles vibro compaction etc Further this volume covers the various aspects of transportation geotechnics related to the static and dynamic performance of pavements reinforced with geosynthetic materials drainage characteristics and the use of marginal materials in pavements etc The book can be a valuable reference for researchers and professionals

OUTCOME-BASED CURRICULUM IN ENGINEERING EDUCATION EARNEST, JOSHUA,GUPTA, SHASHI

KANT,2021-11-02 Engineering Education has emerged as a fast developing discipline in itself with universities across the world opening up exclusive Departments of Engineering Education which is also impacting the socio economic system in India Most of the engineering institutions in India are part of the hub and spoke university education system unique to India Scientifically developing the Outcome based Curriculum OBC uniformly across India has been a daunting task due to the dearth of an authentic book on OBC addressing the need of the Indian Engineering Education System This being the first book of its kind in India and with OBC serving as the Constitution of Outcome based Education OBE it will go a long way to address this need The unique feature of this book is that it is replete with examples to explain the various concepts of planning designing and implementing the OBC in engineering institutions Different aspects of Outcome based Teaching Learning OBTL and Outcome based Assessment OBA are also discussed vividly Apart from the examples weaved into the lucidly written seven chapters additional examples and important formats are provided in the Annexures another unique feature of this book Every engineering UG PG or Diploma teacher would be happy to possess a personal copy of this book for 24x7 access which will help to clear their doubts as it arises then and there TARGET AUDIENCE Technical Instruction Technical Teacher Trainers Curriculum Specialists Instructional Designers Education Policy Makers What the reviewers say The technical education has to adopt Outcome Based Curriculum and there was a dire need of authentic literature which would serve as a base document for scientifically developing OBC The book reflects the expertise of both the authors who have more than 30 years of experience in industry and academics in designing and implementing different variants of OBC for various technical education programmes Such a book will serve as a reference for future generations to avoid re inventing the wheel again and again Dr M P Poonia Vice Chairman AICTE National Institute of Technical Teacher Training and Research NITTTR Bhopal has been spearheading different forms of OBC for the last five decades in which the authors have contributed substantially Care has been taken such that this book will not only benefit the Indian engineering education system but also the engineering teaching fraternity at the international context Dr C Thangaraj Director NITTTR Bhopal

Strategies to Improve the Quality of Foods José Manuel Lorenzo,2023-10-25 Strategies to Improve the Quality of Foods Volume One in the Developments in Food Quality and Safety series explores salt sugar and fat reduction while also discussing natural alternatives and nitrate and nitrate salts Enrichment of foods with prebiotics probiotics and pos biotics in food development is also explored This series is the most up to date resource covering trend topics such as Advances in the analysis of toxic compounds and control of food poisoning Food fraud traceability and authenticity Revalorization of agrifood industry Natural antimicrobial compounds and application to improve the preservation of food Non thermal processing technologies in the food industry and more Edited by Dr Jos Manuel Lorenzo and authored by a team of global experts in the fields of Food Quality and Safety this series provides comprehensive knowledge to food industry personals and scientists Provides latest information regarding the production of food products with modified composition reformulation Brings

modern strategies adopted by the food industry to obtain healthier foods without giving up the highest quality standards
Presents salt sugar and fat reduction strategies in food products *Nonlinear Functional Analysis* S. Kesavan,2004-01-15

Introductory Course on Theory and Practice of Mechanical Vibrations J. S. Rao,1999 The Book Presents The Theory Of Free Forced And Transient Vibrations Of Single Degree Two Degree And Multi Degree Of Freedom Undamped And Damped Lumped Parameter Systems And Its Applications Free And Forced Vibrations Of Undamped Continuous Systems Are Also Covered Numerical Methods Like Holzers And Myklestads Are Also Presented In Matrix Form Finite Element Method For Vibration Problem Is Also Included Nonlinear Vibration And Random Vibration Analysis Of Mechanical Systems Are Also Presented The Emphasis Is On Modelling Of Engineering Systems Examples Chosen Even Though Quite Simple Always Refer To Practical Systems Experimental Techniques In Vibration Analysis Are Discussed At Length In A Separate Chapter And Several Classical Case Studies Are Presented Though The Book Is Primarily Intended For An Undergraduate Course In Mechanical Vibrations It Covers Some Advanced Topics Which Are Generally Taught At Postgraduate Level The Needs Of The Practising Engineers Have Been Kept In Mind Too A Manual Giving Solutions Of All The Unsolved Problems Is Also Prepared Which Would Be Extremely Useful To Teachers

ELECTRICAL CIRCUIT ANALYSIS MAHADEVAN, K.,CHITRA, C.,2018-01-01 The book now in its Second Edition presents the concepts of electrical circuits with easy to understand approach based on classroom experience of the authors It deals with the fundamentals of electric circuits their components and the mathematical tools used to represent and analyze electrical circuits This text guides students to analyze and build simple electric circuits The presentation is very simple to facilitate self study to the students A better way to understand the various aspects of electrical circuits is to solve many problems Keeping this in mind a large number of solved and unsolved problems have been included The chapters are arranged logically in a proper sequence so that successive topics build upon earlier topics Each chapter is supported with necessary illustrations It serves as a textbook for undergraduate engineering students of multiple disciplines for a course on circuit theory or electrical circuit analysis offered by major technical universities across the country

SALIENT FEATURES Difficult topics such as transients network theorems two port networks are presented in a simple manner with numerous examples Short questions with answers are provided at the end of every chapter to help the students to understand the basic laws and theorems Annotations are given at appropriate places to ensure that the students get the gist of the subject matter clearly

NEW TO THE SECOND EDITION Incorporates several new solved examples for better understanding of the subject Includes objective type questions with answers at the end of the chapters Provides an appendix on Laplace Transforms

Automated Technology for Verification and Analysis Madhavan Mukund,Supratik Chakraborty,2012-09-28 This book constitutes the thoroughly refereed proceedings of the 10th International Symposium on Automated Technology for Verification and Analysis ATVA 2012 held at Thiruvananthapuram Kerala India in October 2012 The 25 regular papers 3 invited papers and 4 tool papers

presented were carefully selected from numerous submissions Conference papers are organized in 9 technical sessions covering the topics of automata theory logics and proofs model checking software verification synthesis verification and parallelism probabilistic verification constraint solving and applications and probabilistic systems Classification Techniques for Medical Image Analysis and Computer Aided Diagnosis Nilanjan Dey,2019-07-31 Classification Techniques for Medical Image Analysis and Computer Aided Diagnosis covers the most current advances on how to apply classification techniques to a wide variety of clinical applications that are appropriate for researchers and biomedical engineers in the areas of machine learning deep learning data analysis data management and computer aided diagnosis CAD systems design The book covers several complex image classification problems using pattern recognition methods including Artificial Neural Networks ANN Support Vector Machines SVM Bayesian Networks BN and deep learning Further numerous data mining techniques are discussed as they have proven to be good classifiers for medical images Examines the methodology of classification of medical images that covers the taxonomy of both supervised and unsupervised models algorithms applications and challenges Discusses recent advances in Artificial Neural Networks machine learning and deep learning in clinical applications Introduces several techniques for medical image processing and analysis for CAD systems design

Sentiment Analysis and Knowledge Discovery in Contemporary Business Rajput, Dharmendra Singh,Thakur, Ramjeevan Singh,Basha, S. Muzamil,2018-08-31 In the era of social connectedness people are becoming increasingly enthusiastic about interacting sharing and collaborating through online collaborative media However conducting sentiment analysis on these platforms can be challenging especially for business professionals who are using them to collect vital data Sentiment Analysis and Knowledge Discovery in Contemporary Business is an essential reference source that discusses applications of sentiment analysis as well as data mining machine learning algorithms and big data streams in business environments Featuring research on topics such as knowledge retrieval and knowledge updating this book is ideally designed for business managers academicians business professionals researchers graduate level students and technology developers seeking current research on data collection and management to drive profit IETE Technical Review ,2005
