The Divine Programmer Creating Miracles:

The Divine Programmer Ed Rychkun, 2014-12-13 Authors and Healers Aly McDonald and Ed Rychkun will take you into the fringe of metascience and science to reveal what works in creating healing and reality miracles. The authors bring forward some of the top Healers to example the detailed processes used to define the common denominators when healing miracles do work inside the body. In an attempt to quantify these processes, the authors draw upon a binary/trinary computer analogy to define the Divine Programmer's steps to maximize success. In a revealing journey, you will look into the emerging world of how subtle energy fields such as morphic, zero-point, light body, heart, chakra, auras, and torroids work with quantum energies accessible through the heart/brain rather than the traditional ego/brain. Learn how beliefs stuck in the subconscious as well as curtailing the 3rd stage of human awareness can sabotage efforts and how to change this. In further delving into creating reality miracles outside the body, the authors take you on a journey to analyze the Law of Attraction to see how and why it does work, some of the time, also examining what prevents it from working. After summarizing the Programmer's Code from top Guru's techniques in a new light of trinary versus binary computing, the authors introduce how 50 trillion cells work like computer chips in the ultimate Divine Human trinary computer. Here they develop the processes of how, as a Divine Programmer, using the operating system of Divine Intelligence, the Compiler of the Heart, and the Program Language of Love, one can potentially command the brain to change the holographic reality to attract and create internal and external miracles.

The Divine Programmer II Ed Rychkun, 2015-12-04 In this sequel to *The Divine Programmer Creating Miracles*, the authors will take you out of the norm of the prevailing consciousness and answer radical questions like: Is our reality a holographic illusion? Are we living in a grand immersion movie? Did we create and contract for our Life Plan? Why do miracles work some of the time? How do placebos create dramatic healing miracles? What is the process most common in miracle healing? How can we proactively control our reality? What is the physiological process of mind over matter? Who or what is Divine Intervention? How do we unlock the full potential of DNA? Learn how the brain, as directed by the subconscious mind, is the CEO of our physical reality and how it evolves through stages of evolution to the age of 28. Learn how neurological processes open or limit the ability to proactively create new reality or default to old prevailing boxes of consciousness. In this book, you will understand the statement as above, so below, and how it works in the process of downward causation when you are your Heart/Mind. This book will demystify the subtle energy bodies. It will present how the mind can select and energize visions from the quantum field of infinite possibilities, then direct the subconscious and the brain to change neurological wiring to prepare for a new holographic reality. Understand clearly the key clinically proven steps in reviewing life plans, past, present, and future, to attract and create internal health and external wealth miracles. Know the intricate relationship between the laws of Karma, Cause/Effect, and Attraction.

Snyder, 2012-01-17 A fascinating book about the way four geniuses at Cambridge University revolutionized modern science Newsweek The Philosophical Breakfast Club recounts the life and work of four men who met as students at Cambridge University Charles Babbage John Herschel William Whewell and Richard Jones Recognizing that they shared a love of science as well as good food and drink they began to meet on Sunday mornings to talk about the state of science in Britain and the world at large Inspired by the great 17th century scientific reformer and political figure Francis Bacon another former student of Cambridge the Philosophical Breakfast Club plotted to bring about a new scientific revolution And to a remarkable extent they succeeded even in ways they never intended Historian of science and philosopher Laura J Snyder exposes the political passions religious impulses friendships rivalries and love of knowledge and power that drove these extraordinary men Whewell who not only invented the word scientist but also founded the fields of crystallography mathematical economics and the science of tides Babbage a mathematical genius who invented the modern computer Herschel who mapped the skies of the Southern Hemisphere and contributed to the invention of photography and Jones a curate who shaped the science of economics were at the vanguard of the modernization of science This absorbing narrative of people science and ideas chronicles the intellectual revolution inaugurated by these men one that continues to mold our understanding of the world around us and of our place within it Drawing upon the voluminous correspondence between the four men over the fifty years of their work Laura J Snyder shows how friendship worked to spur the men on to greater accomplishments and how it enabled them to transform science and help create the modern world The lives and works of these men come across as fit for Masterpiece Theatre Wall Street Journal Snyder succeeds famously in evoking the excitement variety and wide open sense of possibility of the scientific life in 19th century Britain splendidly evoked in this engaging book American Scientist This fine book is as wide ranging and anecdotal as excited and exciting as those long ago Sunday morning conversations at Cambridge The Philosophical Breakfast Club forms a natural successor to Jenny Uglow's *The Lunar Men* and Richard Holmes's *The Age of Wonder* Washington Post *The Free System Corollary* Peter J. Morgan, 2019-08-13 Everyone has experienced pain No one is immune from loss and suffering With all of the evil in this world how can anyone rationally believe in a good and loving God People who believe in God experience intense evil yet they still retain their faith claiming that God helps them in times of need Still others claim that this same evil is proof that God does not exist that if God were real he would limit the suffering If you have ever thought that it seems that things should be a certain way that you are inclined toward believing or not believing in God because of the existence of evil you are part of the conversation of the abductive problem of evil This book does more than just explore what modern philosophers on both sides of the aisle have claimed about God and evil It also illuminates an intricate world that is crafted for people having free will for people who make moral choices For it is within the realm of this intricate world that we may find the answers we seek

The Inspiration Machine Eitan Y. Wilf, 2023-11-27 Explores how creative digital technologies and artificial intelligence are embedded in culture and society In *The Inspiration Machine* Eitan Y Wilf explores the transformative potentials that digital technology opens up for creative practice through three ethnographic cases two with jazz musicians and one with a group of poets At times dissatisfied with the limitations of human creativity these artists do not turn to computerized algorithms merely to execute their preconceived ideas Rather they approach them as creative partners delegating to them different degrees of agentive control and artistic decision making in the hopes of finding inspiration in their output and thereby expanding their own creative horizons The algorithms these artists develop and use however remain rooted in and haunted by the specific social predicaments and human shortfalls that they were intended to overcome Experiments in the digital thus hold an important lesson although Wilf s interlocutors returned from their adventures with computational creativity with modified novel and enriched capacities and predilections they also gained a renewed appreciation for and at times a desire to re inhabit non digital creativity In examining the potentials and pitfalls of seemingly autonomous digital technologies in the realm of art Wilf shows that computational solutions to the real or imagined insufficiencies of human practice are best developed in relation to rather than away from the social and cultural contexts that gave rise to those insufficiencies in the first place

Gaming and the Divine Frank G. Bosman, 2019-03-04 This book formulates a new theological approach to the study of religion in gaming Video games have become one of the most important cultural artifacts of modern society both as mediators of cultural social and religious values and in terms of commercial success This has led to a significant increase in the critical analysis of this relatively new medium but theology as an academic discipline is noticeably behind the other humanities on this subject The book first covers the fundamentals of cultural theology and video games It then moves on to set out a Christian systematic theology of gaming focusing on creational theology Christology anthropology evil moral theology and thanatology Each chapter introduces case studies from video games connected to the specific theme In contrast to many studies which focus on online multiplayer games the examples considered are largely single player games with distinct narratives and end of game moments The book concludes by synthesizing these themes into a new theology of video games This study addresses a significant aspect of contemporary society that has yet to be discussed in any depth by theologians It is therefore a fantastic resource for any scholar engaging with the religious aspects of digital and popular culture
