The Effects Of Routine Change On Young Children:

Psychotherapy with Infants and Young Children Alicia F. Lieberman, Patricia Van Horn, 2008-04-08 This eloquent book presents an empirically supported treatment that engages parents as the most powerful agents of their young children's healthy development. Child parent psychotherapy promotes the child's emotional health and builds the parent's capacity to nurture and protect particularly when stress and trauma have disrupted the quality of the parent-child relationship. The book provides a comprehensive theoretical framework together with practical strategies for combining play developmental guidance, trauma-focused interventions and concrete assistance with problems of living. Filled with evocative how-to-do-it examples, it is grounded in extensive clinical experience and important research on early development, attachment, neurobiology and trauma.

Child Rearing in America Neal Halfon, Kathryn Taaffe McLearn, Mark A. Schuster, 2002-07-08 This rich and well-researched volume comes in the wake of intense national interest in young children. Leading scholars from diverse disciplines use relevant data from the Commonwealth Survey of Parents with Young Children to present new information about the lives of families with very young children: how parents spend their time with their children, the economic and social challenges they face and the supports they receive to improve their children's health and development. Such a broad portrait based on nationally representative data has not been attempted before. Drawing on their extensive expertise and research in the issues being addressed, the authors examine and elaborate on the survey findings. They synthesize the major themes emerging from the data and consider the family, community and policy implications to frame and interpret the results. What emerges is a picture of the complex forces that influence families and child rearing in the early years.

Education and Development in Early Years From Cultural-historical Theory Aleksander Veraksa, Yulia Solovieva, Gustavo Cunha de Araujo, 2024-02-21 Cultural-historical theory addresses issues of child development through acquisition of cultural experience as a process of complex cultural activity and thus makes an emphasis on educational process as structured way of learning. Research issues that are raised starting from works of Vygotsky and his followers are connected with educational environment, instruction possibilities and effectiveness, relations of play and education, cognition and emotion in educational process etc. For the past 40 years special attention in terms of practical application was devoted to elaboration of methods that are used for measuring effectiveness of educational environment, for example CLASS, ECERS, structural changes in consciousness of a child, for example executive functions research, research of organization of play activity and development of symbolic function.

Supporting Young Children Through Change and Everyday Transitions Sonia Mainstone-Cotton, 2020-05-21 Explaining the importance of supporting children through change for their wellbeing and social and emotional development, this practical guide gives early years practitioners and parents the tools to help children cope with change and everyday transitions.
