

A close-up, artistic photograph of a woman's face submerged in water. Her eyes are closed, and her expression is peaceful. The water is clear, showing some bubbles and light reflections. The background is a soft, out-of-focus blue and white, suggesting a bright, airy environment.

"A keep-you-up-all-night heart-wrencher that is both beautiful
and raw, painful and uplifting. An incredible read."

Shock Therapy Edward Shorter, David Healy, 2007. Shock therapy is making a comeback today in the treatment of serious mental illness. Despite its reemergence as a safe and effective psychiatric tool, however, it continues to be shrouded by a longstanding negative public image, not least due to films such as the classic *One Flew over the Cuckoo's Nest*, where the inmate of a psychiatric clinic played by Jack Nicholson is subjected to electroshock to curb his rebellious behavior. Beyond its vilification in popular culture, the stereotype of convulsive therapy as a dangerous and inhumane practice is fuelled by professional posturing and public misinformation. Electroconvulsive therapy (ECT) has in the last thirty years been considered a method of last resort in the treatment of debilitating depression, suicidal ideation, and other forms of mental illness. Yet ironically, its effectiveness in treating these patients would suggest it as a frontline therapy bringing relief from acute symptoms and saving lives.
