**Peacekeeping and the African Union** Jude Cocodia, 2017-09-27 This book offers a detailed examination of the effectiveness of the peacekeeping operations of the African Union Despite its growing reputation in peacekeeping and its status as the oldest continental peacekeeper the performance of the African Union AU has hitherto not been assessed This book fills that gap and analyses six case studies Burundi Comoros Somalia Mali Darfur and the Central African Republic From a methodological perspective it takes a problem solving approach and utilises process tracing in its analysis with its standard for success resting on achieving negative peace the cessation of violence and provision of security Theoretically this study offers a comprehensive list of factors drawn from peace literature and field experience which influence the outcome of peacekeeping Beyond the major issues such as funding international collaboration and mandate this work also examines the impact of largely ignored factors such as force integrity and territory size The book modifies the claim of peace literature on what matters for success and advocates the indispensability of domestic elite cooperation local initiative and international political will It recognises the necessity of factors such as lead state and force integrity for certain peace operations In bringing these factors together this study expands the peacekeeping debate on what matters for stability in conflict areas This book will be of much interest to students of peacekeeping African politics war and conflict studies and International Relations in general *Destructive Creation* Mark R. Wilson, 2016-07-06 During World War II the United States helped

vanquish the Axis powers by converting its enormous economic capacities into military might Producing nearly two thirds of all the munitions used by Allied forces American industry became what President Franklin D Roosevelt called the arsenal of democracy Crucial in this effort were business leaders Some of these captains of industry went to Washington to coordinate the mobilization while others led their companies to churn out weapons In this way the private sector won the war or so the story goes Based on new research in business and military archives Destructive Creation shows that the enormous mobilization effort relied not only on the capacities of private companies but also on massive public investment and robust government regulation This public private partnership involved plenty of government business cooperation but it also generated antagonism in the American business community that had lasting repercussions for American politics Many business leaders still engaged in political battles against the New Deal regarded the wartime government as an overreaching regulator and a threatening rival In response they mounted an aggressive campaign that touted the achievements of for profit firms while dismissing the value of public sector contributions This probusiness story about mobilization was a political success not just during the war but afterward as it shaped reconversion policy and the transformation of the American military industrial complex Offering a groundbreaking account of the inner workings of the arsenal of democracy Destructive Creation also suggests how the struggle to define its heroes and villains has continued to shape economic and political development to the present day
