Climate Change and European Security Richard Youngs, 2014-10-10 It is now commonly asserted that climate change will fundamentally change international relations It has been predicted that global warming will increase conflict within and between states intensify food insecurity menace the global trading system and unleash waves of migration As a result governments are beginning to incorporate these warnings into their foreign policy initiatives The appropriateness of their incipient responses needs to be examined in finer detail This book looks at the impact of climate change on European Union EU security policy It explores how governments are reconfiguring their geo strategy and broader international relations in the wake of climate change warnings The book demonstrates that although many aspects of EU foreign policies have begun to change climate security is not yet accorded unequivocal or sufficient priority In doing so Youngs argues that if climate change policies are to have significant effect they can no longer be treated as a separate area of policy but must be incorporated into the more mainstream debates pertinent to EU common foreign and security policy CFSP This book will be of key interest to students scholars and practitioners of climate change and policy energy and environmental policy EU governance and foreign policy European studies international relations geography security studies policy and environmental economics

Mexicano and Latino Politics and the Quest for Self-Determination Armando Navarro, 2015-01-08 This book examines the current status of Mexicano and Latino politics in the United States Political scientist and community activist Armando Navarro maintains that both represent a dysfunctional and failed mode of politics attributable to their system maintenance and mainstream ideological orientation and approach As colonial agents they protect both a United States that is decaying and declining and the degenerative liberal capitalist system Navarro argues that the United States is not a representative democracy but in fact is a White Corpocratic Dictatorship controlled by Capital which is evolving into a Fascist State The book provides an in depth analysis and contention that Mexicanos and Latinos in Aztlan Southwest are an occupied and internal colonized people It argues they are the Palestinians and Kurds of the United States His supposition is sustained by the book's profiles of Mexicano political history demography socioeconomics electoral politics immigration and the Triad Crisis e.g. Second Great Depression Global Economic Crisis and Global Capitalist Crisis Each chapter provides the

justification and case for Navarro's two unique alternative change models applicable to today's bankrupt and failed Mexican and Latino Politics in the twenty first century The preferred model is Aztlan's Politics of a Nation Within a Nation APNWN which is based on the models of the Mormon Nation of Utah and that of French Quebec Navarro therefore calls for the reformation of the United States liberal capitalist system by way of social democracy for the empowerment of Mexicanos and Latinos His second model is Aztlan's Politics of Separatism APS which offers two strategic options 1 Aztlan Southwest becoming a separate and sovereign nation state or 2 its reannexation and re integration with Mexico Navarro outlines a plan of action for building a New Movement designed to attain APNWN or APS In addition several ominous forecasts are made such as the United States being in a state of decline and no longer a hegemonic superpower due to the rise of a multi polar world Moreover Navarro attributes the United States decline to the inherent contradictions of global capitalism His sobering message is that if the current economic conditions are left unchanged this will produce an End of Times scenario the unleashing of the Four Horseman of the Apocalypse

Is the American Century Over? Joseph S. Nye, Jr., 2015-03-05 For more than a century the United States has been the world's most powerful state Now some analysts predict that China will soon take its place Does this mean that we are living in a post American world Will China's rapid rise spark a new Cold War between the two titans In this compelling essay world renowned foreign policy analyst Joseph Nye explains why the American century is far from over and what the US must do to retain its lead in an era of increasingly diffuse power politics America's superpower status may well be tempered by its own domestic problems and China's economic boom he argues but its military economic and soft power capabilities will continue to outstrip those of its closest rivals for decades to come

Thompson, 2013-09-24 China's rising status in the global economy alongside recent economic stagnation in Europe and the United States has led to considerable speculation that we are in the early stages of a transition in power relations Commentators have tended to treat this transitional period as a novelty but history is in fact replete with such systemic transitions sometimes with perilous results Can we predict the future by using the past And if so what might history teach us With *Transition Scenarios* David P Rapkin and William R Thompson identify some predictors for power transitions and take readers through possible scenarios for future relations between China and the United States Each scenario is embedded within a particular theoretical framework inviting readers to consider the assumptions underlying it Despite recent interest in the topic the probability and timing of a power transition and the processes that might bring it about remain woefully unclear Rapkin and Thompson's use of the theoretical tools of international relations to crucial transitions in history helps clarify the current situation and also sheds light on possible future scenarios
