A College For Appalachia P. David Searles, 2021-05-11 Alice Spencer Geddes Lloyd was a New England woman with a mission in life In 1916 she settled on Caney Creek in Eastern Kentucky determined to bring higher education to this remote corner of Appalachia The school she founded now Alice Lloyd College continues to serve the area and its people and to stand as a tribute to Lloyd s remarkable energy determination and vision Lloyd s program combined a rigorous academic curriculum with an intense effort to instill a sense of service in the school s graduates This education was provided free and required only that the students abide by Lloyd s strict rules of conduct and pledge to remain in the mountains after graduating In the first full scale study of Lloyd s life and work and the institution she founded David Searles shows how this courageous and complex woman struggled throughout her long life against seemingly insurmountable odds to create an institution dedicated to improving life in Appalachia But as he acknowledges Lloyd s fundraising activities relied on harmful stereotypes that caused resentment among her mountain neighbors and she often angered others working in the mountains Despite the negative aspects of Lloyd s activities Searles casts serious doubt on the now fashionable conclusion

that the women who came to the mountains to do good created more problems than they solved Lloyd's story he argues demonstrates that much good was indeed accomplished and that the people of the mountains recognized and appreciated her achievement

Impossible Jobs in Public Management Erwin C. Hargrove, John C. Glidewell, 1990 If you think your job is hopelessly difficult you may be right Particularly if your job is public administration Those who study or practice public management know full well the difficulties faced by administrators of complex bureaucratic systems What they don't know is why some jobs in the public sector are harder than others and how good managers cope with those jobs Drawing on leadership theory and social psychology Erwin Hargrove and John Glidewell provide the first systematic analysis of the factors that determine the inherent difficulty of public management jobs and of the coping strategies employed by successful managers To test their argument Hargrove and Glidewell focus on those jobs fraught with extreme difficulties impossible jobs What differentiates impossible from possible jobs are 1 the publicly perceived legitimacy of the commissioner's clientele 2 the intensity of the conflict among the agency's constituencies 3 the public's confidence in the authority of the commissioner's profession and 4 the strength of the agency's myth or long term idealistic goal Hargrove and Glidewell flesh out their analysis with six case studies that focus on the roles played by leaders of specific agencies Each essay summarizes the institutional strengths and weaknesses specifies what makes the job

impossible and then compares the skills and strategies that incumbents have employed in coping with such jobs Readers will come away with a thorough understanding of the conflicting social psychological and political forces that act on commissioners in impossible jobs

CAD/CAM in Practice A.J. Medland, 2012-12-06 Little more than a decade ago computer aided design and manufacture CAD CAM was a very esoteric field indeed not one that was of much practical concern to a manager or industrialist unless his business was on the scale of say a major automobile manufacturer or in a field of high technology such as aerospace Like so much else this situation was revolutionized by the invention of the silicon chip the arrival of the micro processor and the dramatic fall in the cost of computer hardware Today CAD CAM has spread down the market and down the price scale to the point at which it is

both a feasible and an affordable technology for a wide range of small and medium sized companies in areas as various as architecture and general engineering plastic moulding and consumer electronics But the explosion there is no other word for it in the variety and capabilities of CAD CAM systems and their spectacular climb to the top of the hi tech hit parade has placed the potential purchaser and user of the new technology in a difficult position On the one hand he is assured not least by the manufacturers of CAD CAM equipment that a failure to invest in it will leave his company stranded in the industrial Stone Age
