Integrative Production Technology for High-Wage Countries Christian Brecher, 2011-12-19 Industrial production in high wage countries like Germany is still at risk Yet there are many counter examples in which producing companies dominate their competitors by not only compensating for their specific disadvantages in terms of factor costs e.g. wages energy duties and taxes but rather by minimising waste using synchronising integrativity as well as by obtaining superior adaptivity on alternating conditions In order to respond to the issue of economic sustainability of industrial production in high wage countries the leading production engineering and material research scientists of RWTH Aachen
