Kenneth J.E. Graham,2016-02-26 Disciplinary Measures from the Metrical Psalms to Milton studies the relationship between English poetry and church discipline in four carefully chosen bodies of poetry written between the Reformation and the death of John Milton Its primary goal is to fill a gap in the field of Protestant poetics which has never produced a study focused on the way in which poetry participates in and reflects on the post Reformation English Church s attempts to govern conduct Its secondary goal is to revise the understandings of discipline which social theorists and historians have offered and which literary critics have largely accepted It argues that knowledge of the early modern culture of discipline illuminates some important poetic traditions and some major English poets and it shows that this poetry in turn throws light on verbal and affective aspects of the disciplinary process that prove difficult to access through other sources challenging assumptions about the means of social control the structures of authority and the practical implications of doctrinal change More specifically Disciplinary Measures argues that while poetry can help us to understand the oppressive potential of church discipline it can also help us to recover a more positive sense of discipline as a spiritual cure **Corpus Linguistics and Cross-Disciplinary Action Research**

delivered using those teaching methods that have had the greatest impact on disadvantaged learners and this book sets out how the methodology of direct and explicit instruction can be adopted within each subject area Alongside this is a useful summary of staff development and inset which offers practical ways in which teachers adoption of these effective strategies can be facilitated There are also useful sections on creating a whole school dictionary of essential vocabulary creating a culture of reading and writing and also those key literacy barriers experienced by those students with some of the most common special educational needs *Georg Simmel and the Disciplinary Imaginary* Elizabeth S. Ceci, Wendy M. Williams, Shulamit Kahn, 2018-04-20 There is no shortage of articles and books exploring women s underrepresentation in science Everyone is interested academics politicians parents high school girls and boys women in search of college majors administrators working to accommodate women s educational interests the list goes on But one thing often missing is an evidence based examination of the problem uninfluenced by personal opinions accounts of lived experiences anecdotes and the always encroaching inputs of popular culture This is why this special issue of *Frontiers in Psychology* can make a difference In it a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical objective approaches to understanding women s underrepresentation in science today The questions considered within this special issue span academic disciplines methods levels of analysis and nature of analysis what these article share is their scholarly evidence based approach to understanding a key issue of our time *Multi-disciplinary Trends in Artificial Intelligence* Chattrakul Sombattheera, Paul Weng, Jun Pang, 2025-02-19 The two volume set LNAI 15431 and 15432 constitutes the refereed proceedings of the 17th International Conference on Multi disciplinary Trends in Artificial Intelligence MIWAI 2024 held in Pattaya Thailand during November 11 15 2024 The 68 full papers presented in these proceedings were carefully reviewed and selected from 147 submissions The papers focus on various topics in AI and its applications such as deep learning machine learning computer vision pattern recognition and natural language processing *Cross-disciplinary Issues in Compounding* Sergio Scalise, Irene Vogel, 2010 The study of compounds is currently at the center of attention in many areas of both theoretical and applied linguistics This volume brings together contributions by

experts involved in a wide range of such areas based on a large number of diverse languages spoken and signed. The fact that compound constructions are at the interface of the various components of language morphology syntax phonology and semantics makes them ideal testing grounds for models of grammatical architecture as seen in a number of these chapters.
