The Electric Michelangelo English Edition:

The Electric Michelangelo Sarah Hall, 2010-12-22 On the windswept front of Morecambe Bay Cy Parks spends his childhood years first in a guest house for consumptives run by his mother and then as apprentice to alcoholic tattoo artist Eliot Riley Thirsty for new experiences he departs for America and finds himself in the riotous world of the Coney Island boardwalk where he sets up his own business as The Electric Michelangelo In this carnival environment of roller coasters and freak shows Cy becomes enamoured with Grace a mysterious immigrant and circus performer who commissions him to cover her entire body in tattooed eyes Hugely atmospheric exotic and familiar The Electric Michelangelo is a love story and an exquisitely rendered portrait of seaside resorts on opposite sides of the Atlantic by one of the most uniquely talented novelists of her generation *Rethinking Contemporary British Women's Writing* Emilie Walezak, 2021-08-26 Providing

close readings of well known British realist writers including Pat Barker A S Byatt Rose Tremain Sarah Hall Bernadine Evaristo and Zadie Smith this book uses new directions in material and posthuman feminism to examine how contemporary women writers explore the challenges we collectively face today Walezak redresses negative assumptions about realism s alleged conservatism and demonstrates the vitality and relevance of the realist genre in experimenting with the connections between individual and collective voices human and non human meditations local and global scales and author and reader Considering how contemporary realist writing is attuned to pressing issues including globalization climate change and interconnectivity this book provides innovative new ways of reading realism examines how these writers are looking to reinvent the genre and shows how realism helps reimagine our place in the world Senses of Touch: Human Dignity and Deformity from Michelangelo to Calvin Marjorie O'Rourke Boyle, 2021-10-11 Senses of Touch anatomizes the uniquely human hand as a rhetorical figure for dignity and deformity in early modern culture It concerns a valuational shift from the contemplative ideal as signified by the sense of sight to an active reality as signified by the sense of touch From posture to piety from manicure to magic the book discovers touch in a critical period of its historical development in anatomy and society It features new interpretations of two landmarks of western civilization Michelangelo s fresco of the Creation of Adam and Calvin s doctrine of election It also accords special attention to the typing of women as sensual creatures by using their hands as a heuristic Its alternative interpretations explore in theory and in practice the sensuality the creativity and the plain utility of hands thus integrating biology and culture

The Electric Meme Robert Aunger, 2013-07-30 From biology to culture to the new new economy the buzzword on everyone s lips is meme How do animals learn things How does human culture evolve How does viral marketing work The answer to these disparate questions and even to what is the nature of thought itself is simply the meme For decades researchers have been convinced that memes were The Next Big Thing for the understanding of society and ourselves But no one has so far been able to define what they are Until now Here for the first time Robert Aunger outlines what a meme physically is how memes originated how they developed and how they have made

our brains into their survival systems They are thoughts They are parasites They are in control A meme is a distinct pattern of electrical charges in a node in our brains that reproduces a thousand times faster than a bacterium Memes have found ways to leap from one brain to another A number of them are being replicated in your brain as you read this paragraph In 1976 the biologist Richard Dawkins suggested that all animals including humans are puppets and that genes hold the strings That is we are robots serving as life support for the genes that control us And all they want to do is replicate themselves But then we do lots of things that don't seem to help genes replicate We decide not to have children we waste our time doing dangerous things like mountain climbing or boring things like reading or stupid things like smoking that don't seem to help genes get copied into the next generation We do all sorts of cultural things for reasons that don't seem to have anything to do with genes Fashions in sports books clothes ideas politics lifestyles come and go and give our lives meaning so how can we be gene robots Dawkins recognized that something else was going on We communicate with one another and we get ideas and these ideas seem to have a life of their own Maybe there was something called memes that were like thought genes Maybe our bodies were gene robots and our minds were meme robots That would mean that what we think is not the result of our own creativity but rather the result of the evolutionary flow of memes as they wash through us What is the biological reality of an idea with a life of its own What is a thought gene It's a meme And no one before Robert Aunger has established what it physically must be This elegant paradigm shifting analysis identifies how memes replicate in our brains how they evolved and how they use artifacts like books and photographs and advertisements to get from one brain to another Destined to inflame arguments about free will open doors to new ways of sharing our thoughts and provide a revolutionary explanation of consciousness The Electric Meme will change the way each of us thinks about our minds our cultures and our daily choices
