The Modern World

Essential Knowledge: Advancements in science and technology changed the lives of people around the globe. Improved communications and transportation allowed goods, services, and ideas to move rapidly. Inventions and innovations also brought the nations of the world closer and exposed people to other cultures.

Cultures are now blending ideas and customs much faster than before. In addition, the economies of the world's nations are so tightly linked that the actions of one nation affect other nations.

Since 1945, nations have used collective security efforts to solve problems. Personal security of the people of the world is tied to security within and between nations.

Despite efforts to minimize global safety and minimize terrorist attacks, terrorism still threatens the safety of people all over the world. People and nations must work together against the dangers posed by terrorism.
