Lundin, Christophe Midler, 2012-12-06 There is a growing tendency to organize various aspects of business life by projects and to set up temporary organizations in a competition where speed and adaptability becomes a major necessity Organizing by projects is perceived as a good way to ensure action and to stress the importance of getting work done However there is a need to balance the stress on action so that learning capabilities are not only retained but augmented Projects as Arenas for Renewal and Learning Processes provides examples of how different types of projects function from a learning or renewal perspective taken from a wide variety of real life environments in industrial and public organizations This book illustrates the mistaken habit of assuming too much in the project area for example project notions are in fact culture dependent classical market oriented contracting business relations do not fit with the learning dimension of projects and long term learning on core competencies and product development projects need to be connected The book is also intended to represent many of the research frontiers in the project field Enhancing learning capabilities is or should be of a mutual concern to researchers and managers alike

Inter-Regional Place Branding Sebastian Zenker,Björn P. Jacobsen,2015-04-01 This book examines and clarifies key aspects of regional branding with the special focus of inter regional brands Today regions are in strong competition for companies tourists and most of all talent In order to differentiate one region from another regional developers politicians and planners increasingly focus on establishing the region as a brand This is by no means easy since places are complex systems of geographical abstractions in which each place is understood in relation and contrast to other geographical entities In doing so regions not only differentiate but also cooperate within one country or between countries building so called Inter Regional Brands with an even higher degree of complexity Accordingly this volume provides a theoretically well informed but practically oriented overview of this phenomenon including numerous cases and best practices As such it will strongly appeal to both academics and practitioners in the field **Mastering OpenStack** Omar Khedher,Chandan Dutta

Hundreds of books long and short have been written about the Chernobyl tragedy Few people are left indifferent once they understand a little about the biggest technological catastrophe in history Wladimir Tchertkoff s book *The Crime of Chernobyl* the Nuclear Gulag occupies a central place in this library aboutChernobyl Many journalists like Wladimir Tchertkoff a documentary film maker for Swiss television were shocked by what they saw in the areas affected by the radioactive emissions following the explosion at Reactor 4 of the Lenin nuclear power plant in Chernobyl Ukraine Many witnesses like Tchertkoff were revolted by the events that followed in the scientific and political world after the Catastrophe But very few were able to gather together all the facts to back up these feelings of indignation in a formidable work of documentation Tchertkoff s book does not limit itself to remembering the events It demands of each of us that we grasp the fact that following the Chernobyl catastrophe the damage to human health and to the natural environment will be felt for hundreds of years over immense areas of the northern hemisphere contaminated by strontium 90 and caesium 137 and for tens of thousands of years by plutonium in a number of areas of Ukraine Belarus and Russia **Air Pollution Modeling and Its**

Application IX H. Van Dop,George Kallos,2012-12-06 The interest in air pollution modelling has shown substantial growth over the last five years This was particularly evident by the increasing number of participants attending the NATO CCMS International Technical Meetings on Air Pollution modelling and its Application At the last meeting 118 papers and posters were selected from an abundance of submitted abstracts divided over five modelling topics i model assessment and verification including policy applications ii air pollution modelling in coastal areas with emphasis on the mediterranean region iii accidental atmospheric releases including warning systems and regulations iv modelling of global and long range transport and v new developments in turbulent diffusion A round table discussion chaired by John Irwin USA and Jan

Kretzschmar Belgium on the harmonization of air pollution models was attended by more than 50 scientists and is reported in these proceedings The opening paper addressed the main issue of this conference modelling over complex terrain Of particular interest were coastal areas where the surface inhomogeneities introduce small scale circulation and varying atmospheric stability often combined with a complex topography As the conference was located on the beautiful island of Crete problems faced by the host nation particularly Athens and its environs were obvious examples for consideration These together with other regions with similar geographical features were addressed Heavily populated and industrialized as they often are air quality is generally poor there and emission regulations are desired Obviously a major task of air pollution dispersion modelling is to assist policy makers in formulating sensible regulations

On the Happiness of the Philosophic Life Heinrich Meier, 2016-04-01 *On the Happiness of the Philosophic Life* presents Heinrich Meier's confrontation with Rousseau's *Réveries* the philosopher's most beautiful and daring work as well as his last and least understood Bringing to bear more than thirty years of study of Rousseau Meier unfolds his stunningly original interpretation in two parts The first part of *On the Happiness of the Philosophic Life* approaches the *Réveries* not as another autobiographical text in the tradition of the *Confessions* and the *Dialogues* but as a reflection on the philosophic life and the distinctive happiness it provides The second turns to a detailed analysis of a work referred to in the *Réveries* the Profession of Faith of the Savoyard Vicar which triggered Rousseau's political persecution when it was originally published as part of *mile* In his examination of this most controversial of Rousseau's writings which aims to lay the foundations for a successful nonphilosophic life Meier brings to light the differences between natural religion as expressed by the Vicar and Rousseau's natural theology Together the two reciprocally illuminating parts of this study provide an indispensable guide to Rousseau and to the understanding of the nature of the philosophic life A dense but precise and enthralling analysis New Yorker
