

Table 2: Collaborative support to teachers by SLTs within inclusive education

Type of barrier to learning (RSA DBE 2012)	Collaborative support provided by SLTs
Socio-economic deprivation (poverty, lack of access to basic services, inaccessible environments and unsafe buildings)	Provide support to teachers: consultations to make classrooms more accessible for learners who experience barriers (for example, creating an optimal listening and learning environment for learners with hearing impairment, AAC users, etcetera)
Barriers resulting from impairments (physical, cognitive, sensory, developmental and learning impairments)	Provide support to teachers and learners: curriculum adaptation and assessment
Opportunity barriers caused by negative attitudes and stereotyping	SLTs can provide information on disability and barriers to learning to role players and learners in the classroom. Attitudes can be related to the notion that <i>all learners</i> need to be supported. Landsberg et al (2007:20) relate inclusion to beliefs, values and attitudes about diversity, change, collaboration and learning. Negative attitudes, assumptions and beliefs must be addressed directly, as these can be directed into actions and teaching practices.
Inflexible curriculum	Provide support to teachers and learners: curriculum and assessment adaptations
Inappropriate language, or language of learning and teaching (LoLT) and language of communication	Provide individual learner support as well as whole-class support. Provide teacher support with regard to teaching practices and strategies to accommodate learners who are learning in a different language than their home language (L1).
Lack of or inappropriate support services	Collaborate with district-based support teams and other disciplines
Policies and legislation that are inadequate	SLT in an advocacy role: provide information on inclusion to broader community
Lack of parental support and involvement	Continual contact with primary caregivers through, for example, notebooks
